

OFFICE-1 and SRI-ARC User Idents Filter-copied from the Identfile

A very large file, 70 pages but worth recording for later special access, I think.

OFFICE-1 and SRI-ARC User Idents Filter-copied from the Identfile

Note;

1

The following listing of individual user's Idents was made with two filtered copy operations on the Identfile (identfile,idents,master,3:xbb) 11/8/74. Any Ident that passed the filter: ["OFFICE=1"] or ["SRI=ARC"] was copied to this file and then further copied and sorted by Ident and by organization (with the sortnmskp program).

1a

There are several Idents that appear to be obsolete and several others that may be erroneously tagged one way or the other.

1b

There are 195 Office-1-related idents and 108 SRI-ARC-related idents at this first pass. A few are duplicates.

1c

This listing will be further filtered and perhaps used in establishing accounts as appropriate for ARPANET tip use.

1d
