# The Cincomunity

Since Cincom Systems of Canada opened its doors scarcely a year ago, some 18 blue chip companies have chosen its products to achieve their information system goals.

We refer to them proudly as the "Cincomunity".

And it's by no accident that we spell the word with a single "m".

Because, to a person, our customers are in agreement on Cincom products, technical support and follow through.

All of them use TOTAL, the data base management system that has swept the industry — both in the US and in Canada. Users know that TOTAL does what a DBMS is *supposed* to do. Plus, its innovations and improvements add up to a system that actually does *more* than the user originally intended it to.

ENVIRON/I is Cincom's evolutionary new, high-performance terminal monitor and task management system. It's designed to solve major existing problems in commercial, terminal-oriented real time systems. Like TOTAL, ENVIRON/I has become one of the most exciting new products available to the data processing community.

Because of TOTAL, ENVIRON/I, Cincom's Custom Systems and technical support teams, we know the "Cincomunity" will continue to grow; and that Cincom will continue to serve its customers the way they deserve to be served.

If you would like more information, write or call Ian MacLachlan today, for complete details.
