FOR IMMEDIATE RELEASE

NEW SOFTWARE FROM ASHTON-TATE

Inglewood, CA -- The introduction of TimeFrame and FrameLock represents the first in a series of exciting new utility packages to be released by the Ashton-Tate Publishing Group in 1985.

TimeFrame is a desk-top utility program specifically designed to run with Framework, Ashton-Tate's integrated software package. FrameLock, a file encryption program, locks any file that can be read by the IBM PC or compatible computers; Framework is not required to run this program.

TimeFrame and FrameLock were designed for Ashton-Tate by Enabling Technologies, a Chicago-based development firm.

According to Jane Mellin, Ashton-Tate's Director of Publishing, "Ashton-Tate's decision to publish TimeFrame and FrameLock demonstrates our commitment to providing products and services for a broad range of customer needs."

Both products will be available in late July and will sell for a suggested retail price of \$39.95 each. They will be distributed through Ashton-Tate's dealers and distributors.

## GETTING ORGANIZED IS EASY WITH

### TimeFrame™

TimeFrame is your instant assistant for organizing appointments, communicating with people, and getting things done. This practical collection of desk-top utilities is the only package available that is fully-functional with Framework.

TimeFrame features:

\* **APPOINTMENT BOOK**

For daily, monthly, and yearly planning

\* **CALENDAR**

Provides a six-month overview or a full month overview highlighting scheduled appointments and meetings.

\* **CALCULATOR**

Calculations may be entered into your spreadsheets, databases, and wordframes.

\* **OFFICE ASSISTANT**

With three integrated features:

-Directory: Keeps track of names, addresses, and phone numbers

-Letter Writer: Ideal for all correspondence needs

-Mail Merge/Mailing Labels: Information in the directory can be used to personalize letters and produce mailing labels quickly and easily

TimeFrame includes an easy-to-follow tutorial, as well as a Quick Start Guide for computer users already familiar with Framework.

**REQUIREMENTS:** Framework version 1.0 or 1.1

DOS version 2.0 or greater

512K RAM

Any IBM PC/XT/AT; or directly compatible personal computer with two floppy drives, or one fixed disk and one floppy disk drive.

Suggested retail price: \$39.95

PROTECT YOUR MOST CONFIDENTIAL DATA WITH

FrameLock™

FrameLock is a computer program that allows you to lock, or encrypt, computer files that you want to keep secret.

FrameLock will encrypt ANY file\* that can be read by your IBM PC or compatible computer, including files created by:

Framework™	WordStar®
dBASE II®	1-2-3®
dBASE III™	R:base®

and many other popular software programs.

\*Framework is not required.

FrameLock offers you:

- \* Two-levels of security: Normal and High
- \* Password protection: Choose to make your password either visible or non-visible on-screen
- \* An advanced Chain Block Cipher that is virtually unbreakable! The average number of trials to break this code is 9,223,322,036,854,780,000 (nine quintillion).
- \* A powerful, yet easy-to-use program that takes your most sensitive files and scrambles them into non-printable symbols.

REQUIREMENTS: DOS version 2.0 or greater  
Minimum memory of 320K  
IBM PC/XT/AT; or directly compatible personal computer with two floppy disk drives, or one fixed disk and one floppy disk drive.

Suggested retail price: \$39.95
