

# Consider Cincom

**We offer an interactive, on-line data base query facility  
so easy to use - it's almost child's play.**

Experience gained from serving over 2,000 **TOTAL®** Data Base Management System (DBMS) users worldwide has taught us that the success of a DBMS is measured by how rapidly the data resource can be transformed into end-user information.

For many types of information requirements, traditional programming techniques are a time-consuming, costly bottleneck. Cincom's new query facility eliminates this programming need for both ad hoc and repetitive inquiries into the **TOTAL®** DBMS. It provides prompt decision/action information to non-programmer personnel in a logical format.

As proof, we tested our query facility's ease of use with

a random group of children. They mastered the basic inquiry capability in less than two hours. All functions in less than a day. If you consider this type of increased productivity and visibility, this type of bridge over the programming barrier, to be important to your data processing group, shouldn't you consider Cincom?

We're located in 42 cities. In 11 different countries. And on every continent in the world except Antarctica. Contact us for additional information.
