

Consider Cincom

We provide data base and on-line software designed specifically for the needs of the '80's.

The new TOTAL and ENVIRON/1 Series '80' data base/data communication systems are more than the most advanced DB/DC Technology available today. They are also the beginning of the future in information system software for the '80's.

Conceived and developed after a decade of experience in over 2,000 customer DB/DC environments, TOTAL and ENVIRON/1 Series '80', plus a variety of related software products...such as the new T-ASK query facility...are directed toward the information system challenges of the '80's. They will form the nucleus and launch pad for the many end-user oriented soft-

ware tools emanating from Cincom's substantial research and development commitment.

If you consider this type of product development commitment...coupled with a worldwide service support organization in 42 cities, in 11 different countries, on every continent...except Antarctica...to be important to your DB/DC success, shouldn't you consider Cincom?
