

TRUER BLUE.

Cincom's SUPRA[®] High Performance SQL Relational DBMS is now SAA compliant in all VM and MVS environments as well as VSE. It also runs on VAX[™] and UNIX[®]. Better yet, it's the most powerful DBMS around. Because applications built using SUPRA are DB2 compatible, you can implement relational systems today using SUPRA in your existing environment and run with DB2 later without conversion. So now you can go SAA without spending a blue million. Call today for more information.

**NO RISK SUPRA TRIAL.
