

MEMORANDUM

DATE▷ October 6, 1970

TO▷ Tymshare Managers

FROM▷ T. J. O'Rourke

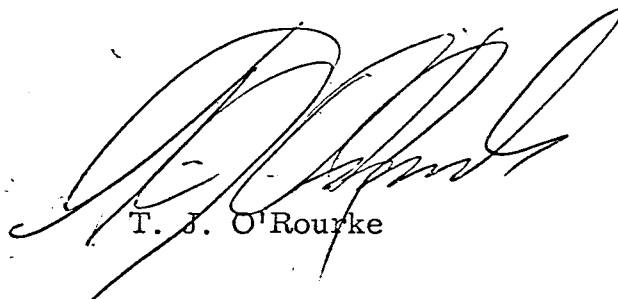

COPIES▷

SUBJECT▷ REORGANIZATION

With growth comes change, and both are a part of Tymshare. For some time now we have been developing an organizational structure that will accommodate the future growth plans of the Company.

The attached chart outlines the new organization which becomes effective immediately.

The principal effect of this realignment is to place the responsibility for the technical development of both hardware and software under Ray Wakeman. John Jerrehian will pull together all of the operations that provide services for field marketing, including the charter to develop a hardware systems capability to more fully exploit our data communication technology. Temporarily, John will also manage the Northwestern Division while Ron Braniff is pulling together the Southwestern and Eastern Regions into the Field Marketing Division.
