

WHAT'S NEW AT TYMSHARE ?

Vol. 1, No. 3

October, 1967

..... FOR TYMSHARE EMPLOYEES ONLY .....

President's Comments:

Since Dave and I covered our new financing in a series of meetings with all of you, I won't devote any space to it here. However, this now opens up a whole new horizon for us as a company. Actually, a horizon that we have been aiming at for a long time. We have signed firm contracts with SDS for 3 more systems and have 3 additional ones in the mill. Getting all that hardware running and paying its way next year is a huge job, and will certainly involve all of us before we're through.

In the area of publicity, we've been very active. By now, all of you have undoubtedly seen the article in Computers and Automation. We were very pleased to see that they ran it in total. We have ordered reprints for use in promotion.

In addition, I spoke to the San Francisco Chapter of the National Association of Accountants and both John and I spoke at the National ADAPSO Conference in San Francisco.

Sales-wise, October promises to be our best month yet for service billing. The sale of equipment has been slow so far, however. In total we should be just about on target.

What's New in the Southern California Division?

Dennis D. Moore has accepted a position with Tymshare Los Angeles in the Technical Division working in applications. He comes to us from Control Data Corp. in Cleveland and should be aboard by December 1st.

Our computer was used for 4 days on the TV call-in show, TEMPO, in Los Angeles. The people calling in played a round of golf against our computer on the Brookside Golf Course in Los Angeles, simulated on the computer.

Ray Wakeman taped a half hour radio show with Joe Pyne. The future of computers in our society and its effect upon the individual was discussed. This show will be run on local Western stations next month.

### What's New in the Northern California Division?

The Northern California Division is expanding! We've added two of IBM's finest salesmen to our Marketing Staff (Gary Myers and Dick Greene); and Robb Alpaugh has joined Virgil's Training and Customer Support staff.

### What's New in the Technical Staff?

Norman Hardy, Ann's husband, has joined the Operating Systems group. Norm will be taking over the Operating System Programming group.

The Subsystem group has been putting out improved versions of subsystems so rapidly lately that the operating divisions are receiving two updates in one mail delivery.

Gary Gorgen has accepted a position as Subsystems Programmer working under Arden Scott. Gary will remain in Los Angeles until December 18 to finish his work at Northrup Engineering School (Gary came to us as an operator at the L. A. Center in January). Gary's initial assignment will be maintenance of the FORTRAN II subsystem. Welcome to the Group of Groping Grinders, Gary.

Robb Alpaugh has left the above group to join Virg's Voracious Vitalizers as an instructor.

Dick Moore is in Canada enjoying Expo 67. Someone carelessly left his leg iron unlocked the other day and he escaped (temporarily) from his teletype.

Ann Hardy has given in to the ravages of time--she is now sporting some very "roomy" and colorful skirt and smock combos.

Neil Sullivan has solved the dilemma of trying to make a decision on which party to attend every weekend. He is quietly letting it slip out that he will marry Peggy Parker in November. He's going to initiate her to life as a "computer world wife" by taking her to FJCC on their honeymoon!

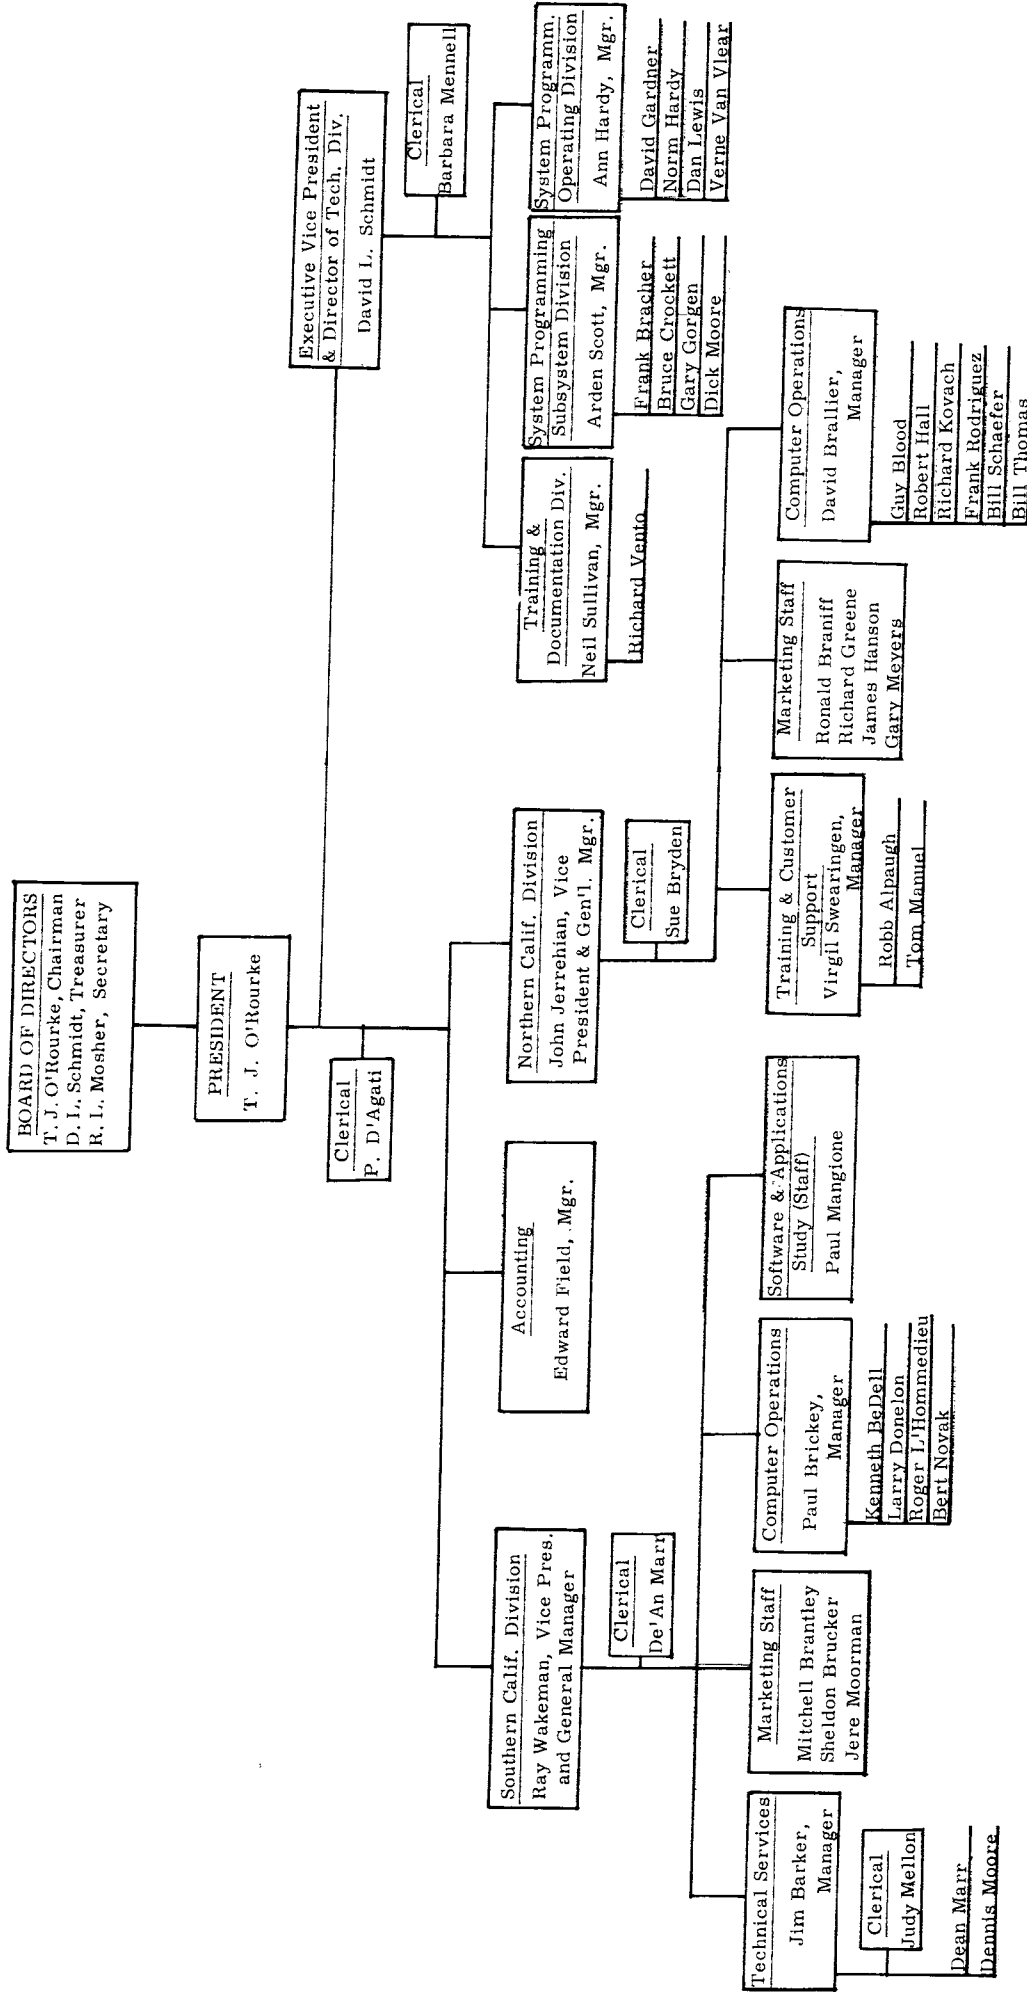

Bruce Crockett has also joined the Group of Groping Grinders. He has been a computer operator at the Palo Alto Center. He will continue the development of CAL and BASIC.

George Kovatch has joined Tymshare and will be doing his best to interpret the produce of the systems and subsystems programmers as a technical writer with Documentation and Training. He has joined us from Hal Lawrence Advertising. Previous to that he worked for Mellonics. George is a graduate of the University of Toronto where he studied Philosophy and History.

### What's New in the Corporate Offices?

Your new roster updates are attached. Also attached is a copy of the current organization chart. Two changes to the chart that did not get in on time--1) exchange Ann and Norm Hardy's names, and 2) Gary Myers' name is misspelled.

Relay any changes to either the roster or the organization chart to Pat D'Agati before November 15. Don't forget that your news has to be in by the 15th too. Surprise me--don't make me bug you for it!

TYMSHARE, INC.
