

## The right partner can make a world of difference...

...**Adamation** was Relational Technology's partner in porting INGRES to the NeXT platform.

No matter what platform your INGRES system runs on, **Adamation** can make a difference in efficiently utilizing man hours and in maximizing the strength of your INGRES applications. Our services are tailored around VMS, UNIX and all platforms which support these operating environments.

**Adamation** is staffed with a solid core of in-house consultants and programmers. Our development team is experienced in the following areas:

**Product Development** - Needs analysis through coding.

**Testing** - Write test plans and maintain test environments to assure the quality of an application.

**Converting** - Convert databases and applications from INGRES 5.0 to 6.0.

**Porting** - Port INGRES applications from one platform to another.

**Documentation** - Technical documentation for programmers or end-users.

**Training** - INGRES instruction as well as general computer systems training.

**Adamation** has developed a tremendous amount of experience from working with all INGRES front-end and back-end products. This experience has made **Adamation** a leading authority in INGRES application development.

**INGRES**

Call **Adamation**, the partner who can make the difference in all your INGRES development efforts!
