Attached is an index of Bob Savell's Computer Strategy Committee file. It contains all minutes plus various other documents.

These documents have been microfilmed, plus one duplicate role--both held by Gordon Bell at the present time.

This index has been sent to you in the event you would like to purge your Computer Strategy Committee files. If you have any documents you think should be added to this index (and spliced to the film) please let me know. A copy of the index will be kept in the library, ML5-4.
