

January 17, 1958

MEMO TO: Mr. S. W. Dunwell  
Mr. F. E. Johnston  
Dr. W. Buchholz

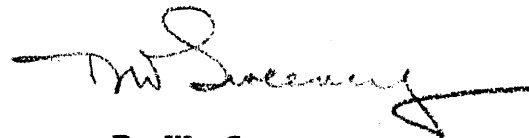

It was agreed in our meeting on Tuesday that the next meeting with LASL will be in Los Alamos sometime during the week of February 17, 1958.

The proposed topics to be discussed or explained are:

1. Program library and automatic programming
2. Completely define the program interrupt feature and its usage
3. Discuss the console
4. Review of the command set defined in the manual
5. Explanation of the flow chart of the computer

With respect to item 1, I believe Mr. J. T. Ahlin or his representative should be invited to discuss the plans of Applied Programming.

If there are any new sections of the manual these should be delivered, and discussed along with the review of the command set.

D. W. Sweeney
