DATE: June 27, 1957

ABSTRACT: This report shows the encoding unit which will
                   be used to produce the decoded address for com-
                   parison with the input address and the logic used
                   for comparison.
