**Project 7000 - Inquiry Stations
Years of July 1944**

July 30, 1944

I certainly was very interested to read your ideas on general purpose inquiry stations. Actually, what you propose is more of a general communication station.

Since the equipment that you have in mind is probably unique to Stretch it is my thought that its planning should be carried on in Mr. Sweeney's group. I'm sure that this will be done as soon as some of the more basic questions are settled. Many thanks for reminding us of a very important aspect of the machine.
