MEMO TO: Mr. H. K. Wild

SUBJECT: Disk for LASL

We have reviewed with Product Planning the point I raised about our contractual obligations. It appears that a single disk unit with the organization you propose in your memo of December 18 will be satisfactory from this point of view.

While the rate of 8 usec/word is half that proposed in the contract, it should not prove to be a limiting factor in the type of problem of greatest interest to LASL. In view of this, doubling the capacity to 2 million words should be attractive to them.

Thus, the new organization is not contingent on raising the density, although we should continue to point out the desirability of doing so.
