Memorandum To: Dr. H. G. Kolsky

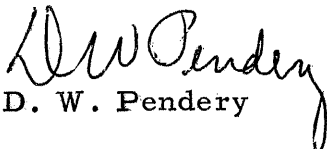

Subject: SIGMA Timing Simulator

I want to congratulate you and Dr. Cocke for an excellent and valuable report.

The effective speeds of SIGMA are lower than we had expected. Your analysis clearly points up the problems, and indicates possible solutions at a time when something can be done.

Thanks for a fine piece of work. I would hope that this could eventually be put forth in a technical report.

D. W. Pendery
