To: Mr. William Dye
Department: Product Planning, 960
Location: San Jose, California

CC: Mr. D. W. Pendery

Subject and/or Reference: STRETCH Timing Simulator

Don Pendery asked me to send you some of my reports on the STRETCH Timing Simulator since you are starting a similar project.

I have selected two memos which I believe are most representative of the studies. Most of the others have to do with problems peculiar to STRETCH, such as the handling of branches, etc., which probably would not interest you.

If you have questions or comments, I will be glad to discuss them further.
