

DOCUMENTS LIST

THE RELATIONAL TECHNOLOGY DOCUMENTS LIST PRIMER

OVERVIEW

In order to keep you up-to-date on the materials and literature available for you to order from Relational Technology corporate headquarters, the marketing services department provides you with a "Documents List" in each monthly Marketing Information Package (MIP).

The Documents List is a report generated each month from the Documents Database -- an INGRES database that resides on LYNX and contains descriptions of all current articles, brochures, press releases, competitive information sheets, white papers, benchmarks, etc. for your general information and sales ammunition.

You'll notice from your documents list that each item has its own document number. This document number is very important. It is your key to ordering literature properly.

THE DOCUMENTS DATABASE

The documents database is accessed by typing DOCUMENTS at the dollar sign prompt. The initial screen of the application describes how you can move through the database, either getting descriptions of the database, reports or summary information. You can, of course, query the database for a specific document using its document number or title.

Descriptive information within this application includes the title of the document, document number, date created, contact person, document type, applicable markets, uses allowed, document cost, document description and use description.

More specifically each document is placed in a category describing its TYPE. The types are:

- AS - Application Story
- BW - Benchmark / White Paper
- DS - Data Sheet
- IN - Introductory Material (includes most brochures, INGRES Advantage, etc.)
- IV - Ivories
- NA - News Article
- OT - Miscellaneous info (includes order forms, hard copies of the slide presentation)
- PR - Public Relations
- PS - Price Sheets
- RE - Product Reviews
- TA - Technical Articles

Each document is also categorized according to its appropriate MARKET USE.

- VMS PC
- CMS ALL
- UNX

MOT-063D-000

And, each document is assigned a specific area of use:

IU	Internal Use Only	AR	Available thru Rep Only
AA	Available to Anyone	ND	Non-Disclosure Only
EC	Existing Customer Only	XX	Archived

ORDERING DOCUMENTS

If you come across something contained in the documents list that you would like to have for your very own, you must order this material through your "Regional Designated Person." The RDP's to date are:

Senora Gay	- Eastern Region
Lydia Martinez	- Western Region
Lil Vernon	- Central Region
Lisa Hardy	- Federal Region
Kathy Sanchez	- National Accounts
Trish Ervin	- OEM Sales

Orders must be placed through this person. Distribution will fulfill your order and mail directly to the office where you reside.

Any questions regarding the documents list or database should be directed to Jeanne Zanussi (CATS::JEANNE)

DOCUMENTS LIST - BY TYPE
