**1270 Terminal Control Unit
Maintenance Manual, Volume II**

1270.20-04

Publication Number 1270.20-04

June 1983

The information in this publication is subject to periodic revisions and to updates by Publication Bulletins. A bulletin is identified as Publication Number 1270.20-04XX, where "XX" equals "01" for the first bulletin released.

To request copies of this publication or any bulletin, contact your Memorex Customer Representative.

A READER COMMENTS form is provided at the back of this publication. If the form has been removed, please send comments to Memorex Corporation, Product Publications, M/S 03-16, San Thomas at Central Expressway, Santa Clara, California 95052

PREFACE

The *1270 Terminal Control Unit Maintenance Manual, Volume II* is intended to serve as the primary reference source for field servicing and performance testing the 1270 TCU. This volume is written to the level of the experienced field engineer (FE), trained in the servicing and testing of similar equipment, or who has completed the Memorex 1270 TCU Field Engineer's Training Course. Many of the performance tests in this manual require the use of the Memorex *Communications Data Reference Card*, Publication Number 12XX.70-00.

TABLE OF CONTENTS

Section	Page	Section	Page
1 INTRODUCTION TO VOLUME II	1-1		
Purpose and Organization	1-1		
Flowcharts	1-1		
Flowchart Descriptions	1-1		
Manual Diagnostic Test Routines	1-1		
System Overview	1-1		
Function	1-1		
Random Access Memory (RAM)	1-1		
Initial Selection	1-1		
Command Execution	1-2		
Ending Sequence	1-3		
Interface Control (I/O)	1-3		
Write-Type Data Transfer	1-3		
Read-Type Data Transfer	1-4		
Byte and Character Count	1-4		
Data Storage	1-4		
Terminal Control	1-5		
Assembly/Disassembly	1-5		
Disassembly	1-6		
Assembly	1-6		
Exceptions	1-6		
Master Control	1-7		
Line Address Window	1-7		
RAM Line Address	1-7		
RAM Line Reg Gate (Early)	1-7		
RAM Line Write (Late)	1-8		
RAM I/O Address	1-8		
RAM I/O Reg Gate	1-8		
RAM I/O Write	1-8		
RAM I/O Late	1-8		
Phase One CLK and Phase Two CLK	1-8		
Latch Enable Bus	1-10		
Lower Speed Waveforms	1-10		
Line Address Bits (1-64), LAC	1-10		
LA Card 00-07 Enables	1-10		
Enable Buses	1-10		
Terminal Control Selection	1-10		
Line Speeds	1-10		
Line Interface	1-10		
Transmit, Asynchronous	1-10		
Transmit, Synchronous	1-10		
Receive	1-11		
Commands	1-11		
Control-Type Commands	1-11		
Enable	1-11		
		Disable	1-11
		Set Mode	1-11
		Set Mode, Asynchronous	1-12
		Set Mode, Bi-Sync	1-12
		Address Prepare (ADPREP)	1-12
		No-Op Type Commands	1-12
		Transmit Type Commands	1-14
		Write	1-14
		Break	1-14
		Write Break	1-14
		Diagnostic Write	1-15
		Wrap	1-15
		Poll	1-15
		Poll, Asynchronous	1-15
		Poll, Bi-Sync	1-15
		Dial	1-16
		Receive-Type Commands	1-16
		Read	1-16
		Read Clear	1-16
		Diagnostic Read	1-16
		Prepare	1-16
		Prepare, Asynchronous	1-16
		Prepare, Bisynchronous	1-16
		Inhibit	1-16
		Search	1-16
		Sense-Type Commands	1-16
		Test-I/O-Type Commands	1-17
		Status, Sense, and Halt/Stack/Stop	1-17
		Status	1-17
		Sense	1-17
		Halt/Stack/Stop	1-17
		Halt	1-17
		Stack	1-17
		Stop	1-17
		Flowchart Conventions	1-17
		Symbols	1-18
		Statement	1-18
		Predefined Process	1-18
		Decision	1-18
		Notation	1-18
		Terminal	1-18
		On-Page Connector	1-18
		Off-Page Connector	1-18
		Parallel Operation	1-18
		Flowlines	1-18
		Logic References	1-18
