

WHY DID SOFTWARE DESIGN BUY A USED DP PRODUCTION CONTROL SYSTEM?

TO GIVE DP MANAGERS A PROVEN PERFORMER.

At Software Design Associates we've spent eleven years developing a reputation for software that business can count on.

So before we acquired a DP production control system, we evaluated many systems—and used the same criteria you would. We wanted a system with maximum capability and proven performance.

We found it in Dimension V—a system already in use by a major airline, leading auto maker, giant bank, and well-known railroad, to mention just a few.

Originated by Software Systems Corporation, Dimension V is now owned and marketed by SDA Products, Inc., a subsidiary of Software Design Associates.

More than a job scheduler, Dimension V is a total data-center production control system.

It automates, schedules, and will forecast workflow and

resource capacities of existing, new, proposed, or hypothetical configurations.

Reports a leading paper company, "Before we installed Dimension V, our system was all peaks and valleys. Dimension V leveled our workload and cut turnaround time dramatically. What used to take two to six hours now takes minutes."

If you're tired of peaks and valleys, if you'd like to speed turnaround and cut DP operations costs, get the facts about Dimension V. On Line or Batch. Another proven product from Software Design Associates.
