# Solaris®

## PRODUCT HIGHLIGHTS

The Solaris® distributed computing environment is the cornerstone of your open computing environment. It integrates the most powerful distributed computing products available today. With more than 4,000 independent software applications running on over 500,000 installed SPARC® systems worldwide, the Solaris system is the world's most popular and fastest growing 32-bit environment.

Solaris 1.0.1 includes:

- The broadest base of application support for any RISC/UNIX® operating environment in the world today.
- SunOS™ 4.1.2—the industry's leading 32-bit implementation of the UNIX Operating System based on BSD 4.3 and AT&T's System V Operating System.
- The DeskSet™ suite of 14 productivity tools, including Multimedia Mail, Workgroup Calendar Manager, and Networked File Manager. Solaris 1.0.1 includes both Version 2 and Version 3 of DeskSet.
- OpenWindows™ and OPEN LOOK® Graphical User Interface (GUI) that provide an easy-to-use, network-based windowing environment. Solaris 1.0.1 includes both Version 2 and Version 3 of OpenWindows.
- ONC™/NFS™—the defacto industry standard for networking software providing connectivity to all popular proprietary or standard networking systems within or outside your organization.

The Solaris environment protects and enhances your system investment by integrating worldwide industry standards, including X/OPEN™ Portability, AT&T System V Interface Definition, and SPARC Compliance Definition 1.1, with ease-of-use and a robust toolset.

*Solaris® is easy  
to use for  
developers and  
end-users.*

*Solaris® runs  
the industry's  
most popular  
applications.*
