WELCOME TO THE OTHER OFFICE OF THE FUTURE.

INTRODUCING THE GAVILAN™ MOBILE COMPUTER.

Those of us who've become accustomed to the conveniences of office automation have seen vast improvements in our work-styles. Leaving the office and its advantages to conduct business in the field can be a dispiriting prospect.

And yet, the men and women who consistently work away from their desks —field-support reps, job-site managers, salespeople —have no choice in the matter. Office automation hasn't moved fast enough for mobile professionals.

Until now.

Meet the Gavilan mobile computer — nine pounds of heavyweight 16-bit computer power combined with a detachable five pound printer.

THE PROFESSIONAL'S APPROACH TO OFFICELESS AUTOMATION.

What you see is a complete portable computer that fits inside a briefcase. A full-size typewriter keyboard and 10-key numeric pad. An 8 line by 66 character fold-down display screen. An integrated solid-state mouse. And a 50-character per second correspondence-quality 8½" x 11" and legal page printer.

What you don't see is an integrated communications modem. An internally contained 3" microfloppy disk drive. Up to four enclosed software capsules. And a full complement of mobile software developed specifically for the professional on the move.

TRAVEL LIGHT, TRAVEL SMART. TAKE THE MOBILE COMPUTER.

The Gavilan mobile computer and its CapsuleWare™ software enable the mobile professional to manage business anywhere. The software programs, from word processing, calculation & analysis, and portable secretary to communications provide truly sophisticated solutions to information management in the field. Its menu-driven format is totally integrated and features self-contained instructions and interactive prompts. Commands are chosen from selection menus via the integrated mouse — keyboard entry is at an absolute minimum. And the entire system is built for the daily rigors of the road.

But above all, with complete battery-powered computation, storage and printing in the field, it lets mobile professionals benefit from the full advantages afforded by office automation.

The Gavilan mobile computer.

All of the advantages, none of the encumbrances.
