

**MONROE 6F** *Fully Automatic Calculator*

For your daily round-up of figuring tasks, you want a calculator with a realistic approach. One that is bed-rock simple to operate within a down-to-earth budget. The new Monro-Matic 6F meets your specifications.

Take a look at the keyboard: it speaks your language -- simple, understandable. Keys and controls within the span of your hand -- no reaching, no searching. Familiar arithmetic symbols identify the functional keys, color coded for the job to be done.

And -- you want this simplicity backed by the same sophisticated standards as the highest priced Monroe. Operational streamlining is built into the 6F. No time wasted positioning the carriage for correct decimal placement. No endless entering of zeros during multiplication -- and, when the 6F flashes the answer, it's ready to accept an addition or subtraction without re-aligning the carriage.

No unnecessary complications in your figuring life with the 6F. Watch the dials clear themselves smoothly -- automatically -- as the multiplication or division unravels. See the carriage glide into correct decimal position -- automatically. Automatically, too, the keyboard clears itself -- and, the 6F will faithfully retain a constant multiplier for repeated use -- until you enter a new one.

Rugged enough for a masculine hand -- responsive to the lightest feminine touch -- the 6F was designed to meet the full range of your office needs. Simple? Straightforward? Easy to operate? That's the 6F. But inside the case -- the sophistication of Monroe's half-century of experience.

**Automatic Zeros** - a standard with every Monroe ■ **Automatic Decimals** - nothing to remember, no wondering if the answer is right ■ **Single Keyboard** - concentrate in one spot with no wandering of eyes and fingers from one side to the other ■ **Automatic Clearance** - step right up and start your problem. Any previous figure clears automatically ■ **Functional Color Coding** - green for multiplication . . . red for division. Corresponding decimal place markers draw your eyes to the answer ■ **Operational Ease** - See for yourself. No need to move the carriage. Use the same setup for every operation

**Automatic Multiplication with Clearance** ■ **Automatic Negative Multiplication** ■ **Automatic Accumulative Multiplication** ■ **Automatic Positioning of Carriage** ■ **Constant Multiplication** - no locks required ■ **Automatic Division** ■ **Constant Dividend** ■ **Addition and Subtraction** ■ **Automatic Squaring** ■ **Negative Division** ■ **Accumulative Quotients** ■ **19 Half Cent Adjustment Positions**

While the Monro-Matic® 6F is a simple, straightforward calculating machine, it performs like a champion, often giving back twice as much work as was put into it. A payroll clerk, for example, enters only the rate and hours; the 6F delivers both total pay and overtime pay with equal ease. Or, because the answer dials have ample capacity, the 6F can produce base pay, total pay and overtime pay in one calculation. That's three results at once.

HOURLY RATE.....	\$2.17	BASE PAY.....	\$86.80
OVERTIME HOURS × 1.5.....	16.5	OVERTIME PAY.....	35.81
TOTAL HOURS.....	56.5	GROSS PAY.....	122.61
WITHHOLDING TAX RATE....	.18	WITHHOLDING TAX.....	15.05
FICA RATE.....	.03625	FICA.....	4.44
DEPENDENTS.....	3	TOTAL DEDUCTIONS.....	19.49
DEPENDENTS X \$2.34.....	7.02	NET PAY.....	103.12

Prorations are always rounded off automatically. There's never a need to total individual amounts to insure accuracy, for the 6F can show either a zero proof indicating that all amounts were entered correctly, or accumulate to the amount being prorated. Simple, straightforward — completely automatic figuring.

DEPT.	FLOOR SPACE	PRORATED AMOUNTS
A	4684	\$2021.29
B	3575	1542.73
C	2290	988.21
D	1840	794.02
	<u>12389</u>	<u>\$5346.25</u>

Invoice checking is made easier with the 6F, too. The answer decimal is automatically aligned with the keyboard decimal so that freight charges can be added without repositioning the carriage. And the Monro-Matic 6F will round off in any of 19 places.

QUANTITY	ITEM	PRICE	AMOUNT
25	DB-T10 @	\$1.25	\$31.25
12	CN-709 @	1.44	17.28
22	G5-11C @	3.30	72.60
			<u>121.13</u>
		Freight	11.57
			<u>\$132.70</u>

Used with equal ease by clerks, technicians, engineers or busy executives, the 6F has become a standby for cost accounting work — finds itself at home figuring cuts and fills, closed traverse and interpolations — never finds a figure too large or too complex in decimal arrangement.

Try the Monro-Matic 6F on your own work. You'll find it easy to use, easy to own, but never easy to do without.
