

DDN LIBRARY INDEX BY DATE
Created by Elizabeth "Jake" Feinler, 2012

NOTE: This file was created from the DDN Index by Numbers by sorting on the numbers on the left. The first two numbers represent a date. However, WORD threw away several of the second and third lines in many cases, but not in others. Therefore, to find a complete title or reference either consult the DDN Index by Number file in box 062309881 or look in the actual physical files under the last part of the document number, eg. 1122 not 64-1122. Beware that searches for titles split across lines do not always work even when the second or third line is there.

64-1122	On distributed communications networks
68-1369	A scheduling philosophy for multiprocessing systems
68-1424	A research center for augmenting human intellect
68-1698	USAS X3.4-1968, USA standard code for information exchange
70-1356	Host-Host communication protocol in the ARPA network
70-1357	The interface message processor for the ARPA computer network
71-0286	The File Transfer Protocol
71-1275	Remote Job Entry to CCN via UCLA Sigma 7: A scenario
71-1294	NETRJS Remote operator commands
71-1344	Official initial connection protocol, Document No. 2, NIC 7101
71-1382	The design of a switching system to allow remote access to computer services by other computers and terminal devices
71-1699	Features of a proposed synchronous data network
71-1982	SEX beginner's guide
71-2233	Transmittal letter for NIC 5145, Current Catalog of the NIC Collection
72-0399	UCLA campus computing network liaison staff for ARPA network
72-1161	Telnet reconnection option
72-1162	Telnet approximate message size negotiation option
72-1278	Host/host protocol for the ARPA network
72-1351	Flow control in a resource-sharing computer network
72-1361	Function-oriented protocols for the ARPA computer network
72-1380	The system architecture of the distributed computer system – The communications system
72-1391	Resource-sharing computer communications networks
72-1437	A system for interprocess communication in a resource sharing computer network
72-1444	A computer terminal network for transparent stimulation of the user of an on-line retrieval system, NBS Tech. Note 732
72-2020	The Terminal IMP [TIP] for the ARPA computer network
73-1160	Telnet output page size option
73-1280	Telnet output line width option
73-1320	Omnigraph: Simple terminal-independent graphics software
73-1324	Origin, development and current status of the ARPA network

73-1326 Presentation and major design aspects of the CYCLADES computer network

73-1395 Network Graphics Group NGG Note 5, Proposed network graphics protocol

73-1408 The augmented knowledge workshop

73-1409 Design considerations for knowledge workshop terminals

73-1416 INWG 16, Host/Host protocol design considerations

73-1433 INWG 20, Address format in Mitranet

73-2105 Static language analysis, NBS Tech. Note 797, Natl. Bureau of Standards

73-2106 User procedures standardization for network access, NBS Tech. Note 799, Natl. Bureau of Standards

73-2107 Network user information support, NBS Tech. Note 802, Natl. Bureau of Standards

73-2226 TELNET Timing Mark Option, NIC 16238, May 1973

73-2227 TELNET Echo Option, NIC 15390, Aug. 1973

73-2228 TELNET suppress go ahead option, NIC 15392, Aug. 1973

73-2229 TELNET option specifications, NIC 18640, Aug. 1973

73-2230 TELNET binary transmission option, NIC 15389, Aug. 1973

73-2231 TELNET protocol specification, Aug. 1973, NIC 18639

74-0856 The Terminal Interface Message Processor program, Dec. 1974 update ed.

74-0968 Arpanet Directory, Jun 1974 vers

74-0979 Interface message processor specification for the interconnection of a

74-1322 Description of a multi-host journal system

74-1323 Journal subscription service, NIC 23143

74-1332 NSC Note45, Everything you always wanted to know about Gain

74-1334 A protocol for packet network intercommunication

74-1346 Some computer network interconnection issues

74-1363 SITA: Rating packet-switched network

74-1383 SPIDER – a data communications experiment, Bell Labs. Computing science technical report No. 23

74-1392 An approach to graphics system design

74-1411 Line-processor – A device for amplification of display terminal capabilities for text manipulation

74-1412 Display techniques for interactive text manipulation

74-1441 A guide to networking terminology, NBS Tech. Note 803

74-1443 Network management survey, NBS Tech. Note 805

74-2108 Cost-benefit analysis of computer graphics systems, NBS Tech. Note 826, Natl. Bureau of Standards

74-2109 Cost analysis for computer communications, NBS Tech. Note 845, Natl. Bureau of Standards

74-2380 The Network Control Center program, BBN Tech. Info. Rept. No. 90

75-0084 The Interface Message Program, June 1975 update edition

75-0668	Comments on IMP/Host protocol changes (RFCs 687 and 690)
75-0946	Arpanet transition plan
75-0969	Arpanet Directory, Jul 1975 vers
75-1104	The ARPA network
75-1328	Gain again, NSC Note 58
75-1331	NSC Note 56, Nothing to lose, but lots to Gain
75-1345	The organization of computer resources into a packet radio network
75-1349	Broad-band interactive communication services to the home: Part II – Impasse
75-1410	Coordinated information services for a discipline-or mission-oriented community
75-1442	Software testing for network services, NBS Tech. Note 874
75-1470	Inter-Network naming, addressing, and routing
75-2110	The service concept applied to computer networks, NBS Tech. Note 880, Natl. Bureau of Standards
75-2111	Criteria for the performance evaluation of data communications services for computer networks,
76-0857	Terminal-to-host protocol specification
76-0947	Transmission control protocol specification, DCEC rept. 35938, Jul 15, 1976
76-0970	Arpanet Directory, Jul 1976 vers
76-0976	Arpanet Protocol Handbook, rev. Apr. 1976
76-1338	ISO 2014-1976 (E), Writing of calendar dates in all-numeric form
76-1358	Virtual circuits vs. Datagrams - Technical and political problems
76-1365	Planned new public data networks
76-1377	Virtual terminal protocol (Proposal 2), EIN/ZHR/76?002
76-1394	Infonet: The evolution of a network
76-1401	New directions in cryptography
76-1402	Siemens system EDX – A new stored program controlled switching system for telex and data networks
76-1403	A European Informatics Network: Achievement and prospects
76-1404	An overview of recent developments in common user data communications networks
76-1405	A method of deadlock-free resource allocation and flow control in packet networks
76-1406	A high-level framework for network-based resource sharing
76-1407	User interface design issues for a large interactive system
76-1417	Datapac network overview
76-1418	International interconnection of public packet networks
76-1419	A public data network in the Nordic countries
76-1420	The French public packet switching service: The Transpac network
76-1421	TYMNET: An alternative to packet technology
76-1422	Some design aspects of a public packet switched network
76-1423	The implementation of an end-to-end protocol by EIN Centres: A survey and comparison
76-1429	Ethernet: Distributed packet switching for local computer networks

76-2104	Interpretation of data in the Network Measurement System, NBS Tech. Note 897, Natl. Bureau of Standards
76-2112	The network measurement machine – A data collection device for measuring the performance and utilization
76-2113	A review of network access techniques with a case study: The network access machine,
76-3073	Arpanet Resource Handbook, SRI-NIC Rept. NIC 39335, 1976
77-0971	Arpanet Directory, Jul 1977 vers
77-1103	Throughput in the Arpanet—Protocols and measurements
77-1337	The identification data base in a networking environment
77-1364	Interconnection of computer networks
77-1381	The National Software Works: A distributed processing system
77-1618	CCITT Recommendation Fascicle VIII.2, X.21 bis, Use on public data networks of data terminal equipments (DTEs) which are designed for interfacing to synchronous V-series modems
77-1619	CCITT Recommendation Fascicle VIII.2, X.25, Interface between data terminal equipment (DTE) and data circuit-terminating equipment (DCE) for terminals operating in the packet mode on public data networks
77-1628	CCITT Recommendation Fascicle VIII.2, X.21, General purpose interface between data terminal equipment (DTE) and data circuit-terminating equipment (DCE) for synchronous operation on public data networks
77-2288	International standard for data communications: A status report
77-2289	The Arpanet telnet protocol: Its purpose, principles, implementation, and impact on host operating system design
77-2290	TYMNET – maintenance considerations in a very large network
78-0972	Arpanet Directory, Dec 1978 vers
78-0977	Arpanet Protocol Handbook, rev. Jan. 1978
78-1069	A tutorial on protocols, Proc. IEEE, v66:11, Nov. 1978
78-1123	The information technology series. Vol. IV. Computer networks and communication
78-1124	Computer network development to achieve resource sharing
78-1125	Improvements in the design and performance of the ARPA network
78-1126	A resource sharing executive for the ARPANET
78-1127	A perspective on network operating systems
78-1128	A new minicomputer/multiprocessor for the ARPA network
78-1129	A network-oriented multiprocessor front-end handling many hosts and hundreds of terminals
78-1130	Experiences in building, operating, and using the ARPA network
78-1131	ALOHA packet broadcasting—a retrospect
78-1132	Routing and control in a centrally directed network
78-1133	TYMNET as a multiplexed packet network
78-1134	Some design and evaluation techniques for data communications systems
78-1135	Hybrid switching systems in computer communication networks

78-1136	The organization of computer resources into a packet radio network
78-1137	Packet radio system—network considerations
78-1138	Design issues for mixed media packet switching networks
78-1139	Random access techniques for data transmission over packet-switched radio channels
78-1140	Issues in packet switching network design
78-1141	Computer communication networks—The parts make up the whole
78-1142	A possible structure for designing computer communication networks and the near-term possibilities
78-1164	Interface message processor, specifications for the interconnection
78-1325	Advances in packet radio technology
78-1329	Introduction to a mail protocol, INWG 18079-1330 A basic mail scheme for EIN, INWG 192
78-1341	An introduction to local area networks
78-1342	High-level protocols
78-1347	Hiding information and signatures in trapdoor knapsacks
78-1367	A method for obtaining digital signatures and public-key cryptosystems
78-1389	Operating systems for computer networks
78-1474	Connection management in transport protocols
78-1476	General purpose packet satellite networks
78-1989	Automated validation of a communications protocol: the CCITT X.21 recommendation
78-1992	General technique for communications protocol validation
78-2002	Applications of information networks
78-2023	Design concepts for the next generation CONUS Autovon, DCEC Tech. Rept. 18-78
78-2189	Mechanisms for a reliable timer-based protocol
78-2220	What is a “distributed” data processing system?
78-2221	Distributed data processing
78-2224	Principles and lessons in packet communications
78-2514	ANSI/IEEE Std 488-1978, IEEE standard digital interface for programmable instrumentation
78-2569	DoD-STD-100C, Military Standard, Engineering drawing practices

- 85-1595 CCITT Recommendation Fascicle VII.3, T.60, Terminal equipment for use in the teletex service
- 85-1596 CCITT Recommendation Fascicle VIII.6, X.310, Procedures and arrangements for data terminal equipments accessing circuit switched digital data services through analogue telephone networks
- 85-1597 CCITT Recommendation Fascicle VIII.6, X.350, General requirements to be met for data transmission in the maritime satellite service
- 85-1598 CCITT Recommendation Fascicle VIII.6, X.351, Special requirements to be met for packet
- 85-1599 CCITT Recommendation Fascicle VIII.6, X.352, Interworking between public packet switched data
- 85-1600 CCITT Recommendation Fascicle VIII.6, X.353, Routing principles for interconnecting the maritime
- 85-1601 CCITT Recommendation Fascicle VIII.4, X.80, Interworking of interexchange signaling systems for circuit switched data services
- 85-1602 CCITT Recommendation Fascicle VIII.4, X.92, Hypothetical reference connections for public synchronous data networks
- 85-1603 CCITT Recommendation Fascicle VIII.7, X.411, Message handling systems: Message transfer layer
- 85-1604 CCITT Recommendation Fascicle VIII.7, X.420, Message handling systems: Interpersonal messaging user agent layer
- 85-1605 CCITT Recommendation Fascicle VIII.7, X.430, Message handling systems: Access protocol for teletex terminals
- 85-1606 CCITT Recommendation Fascicle VIII.7, X.401, Message handling systems: Basic service elements and optional user facilities
- 85-1607 CCITT Recommendation Fascicle VIII.7, X.408, Message handling systems: Encoded information type conversion rules
- 85-1608 CCITT Recommendation Fascicle VIII.7, X.409, Message handling systems: Presentation transfer syntax and notation
- 85-1609 CCITT Recommendation Fascicle VIII.7, X.410, Message handling systems: Remote operations and reliable transfer server
- 85-1610 CCITT Recommendation Fascicle VIII.3, X.28, DTE/DCE interface for a start-stop mode data terminal equipment accessing the packet assembly/disassembly facility (PAD) in a public data network situated in the same country

- 85-1611 CCITT Recommendation Fascicle VIII.3, X.28, DTE/DCE interface for a start-stop mode data terminal equipment assessing the packet assembly/disassembly facility (PAD) in a public data network situated in the same country
- 85-1612 CCITT Recommendation Fascicle III.5, I.462, Support of packet mode terminal equipment by an ISDN
- 85-1613 CCITT Recommendation Fascicle III.5, I.463, Support of data terminal equipments (DTEs) with V-series type interfaces by an integrated services digital network (ISDN)
- 85-1614 CCITT Recommendation Fascicle III.5, I.464, Multiplexing, rate adaptation and support of existing interfaces for restricted 64 kbits/s transfer capability
- 85-1615 CCITT Recommendation Fascicle III.5, I.460, Multiplexing, rate adaption and support of existing interfaces
- 85-1616 CCITT Recommendation Fascicle III.5, I.461, Support of X.21 and X.21 bis based data terminal equipments
- 85-1617 CCITT Recommendation Fascicle III.5, I.410, ISDN user-network interfaces
- 85-1622 CCITT Recommendation Fascicle VIII.3, X.24, List of definitions for interchange circuits between
- 85-1623 CCITT Recommendation Fascicle VIII.3, X.22, Multiplex DTE/DCE interface for user classes 3-6
- 85-1624 CCITT Recommendation Fascicle VIII.2, X.21 bis, Use on public data networks or data terminal
- 85-1625 CCITT Recommendation Fascicle VIII.2?, X.20 bis, Use on Public data networks of data terminal equipment (DTE) which is designed for interfacing to asynchronous duplex V-series modems
- 85-1626 CCITT Recommendation Fascicle VIII.3, X.32, Interface between data terminal equipment (DTE)
- 85-1627 CCITT Recommendation Fascicle VIII.3, X.31, Support of packet mode terminal equipment by an ISDN
- 85-1628 CCITT Recommendation Fascicle VIII.3, X.29, Procedures for the exchange of control information and user data between a packet assembly/disassembly (PAD) facility and a packet mode DTE or another PAD
- 85-1629 CCITT Recommendation Fascicle III.5, I.340, ISDN connection types
- 85-1630 CCITT Recommendation Fascicle VIII.4, X.56, Interface between synchronous data networks using
- 85-1631 CCITT Recommendation Fascicle VIII.4, X.57, Method of transmitting a single lower speed data channel on a 64 kbit/s data stream
- 85-1632 CCITT Recommendation Fascicle VIII.4, X.60, Common channel signaling for circuit switched data applications
- 85-1633 CCITT Recommendation Fascicle VII.3, A.21, Collaboration with other international organizations on

- 85-1634 CCITT Recommendation Fascicle VII.3, T.0, Classification of facsimile apparatus for document transmission over the public networks
- 85-1635 CCITT Recommendation Fascicle VII.3, T.1, Standardization of phototelegraph apparatus
- 85-1636 CCITT Recommendation Fascicle VII.3, T.2, Standardization of Group 1 facsimile apparatus for document transmission
- 85-1637 CCITT Recommendation Fascicle VII.3, T.3, Standardization of Group 2 facsimile apparatus for document transmission
- 85-1638 CCITT Recommendation Fascicle VII.3, T.4, Standardization of Group 3 facsimile apparatus for document transmission
- 85-1639 CCITT Recommendation Fascicle VII.3, T.5, General aspects of Group 4 facsimile apparatus
- 85-1640 CCITT Recommendation Fascicle VII.3, T.6, Facsimile coding schemes and coding control functions for Group 4 facsimile apparatus
- 85-1641 CCITT Recommendation Fascicle VII.3, T.10, Document facsimile transmissions on leased telephone-type circuits
- 85-1642 CCITT Recommendation Fascicle VII.3, T.10, Document facsimile transmissions in the general switched telephone network
- 85-1643 CCITT Recommendation Fascicle VII.3, T.11, Phototelegraph transmissions on telephone-type circuits
- 85-1644 CCITT Recommendation Fascicle VII.3, T.12, Range of phototelegraph transmissions on a telephone-type circuit
- 85-1645 CCITT Recommendation Fascicle VII.3, T.20, Standardized test chart for facsimile transmissions
- 85-1646 CCITT Recommendation Fascicle VII.3, T.15, Phototelegraph transmission over combined radio and metallic circuits
- 85-1647 CCITT Recommendation Fascicle III.5, I.412, ISDN user-network interfaces, Interface structures and access capabilities
- 85-1648 CCITT Recommendation Fascicle III.5, I.421, Application of I-series recommendations to ISDN user-network interfaces
- 85-1649 CCITT Recommendation Fascicle III.5, I.421, Application of I-series recommendations to ISDN
- 85-1650 CCITT Recommendation Fascicle III.5, I.430, ISDN user-network interfaces: Layer 1 recommendations, Section 3
- 85-1651 CCITT Recommendation Fascicle III.5, I.431, Primary rate user-network interface – Layer 1 specification
- 85-1652 CCITT Recommendation Fascicle III.5, I.440, ISDN user-network interface data link layer – General aspects
- 85-1653 CCITT Recommendation Fascicle III.5, I.441, ISDN user-network interface data link layer specification
- 85-1654 CCITT Recommendation Fascicle III.5, I.450, ISDN user-network interface layer 3 – General aspects

- 85-1655 CCITT Recommendation Fascicle VIII.2, A.20, Principle governing the collaboration between the CCITT and other international organizations in the study of data communications
- 85-1656 CCITT Recommendation Fascicle VIII.2, X.1, Services and facilities – International user classes of service in public data networks and integrated services digital networks (ISDNs)
- 85-1657 CCITT Recommendation Fascicle VIII.2, X.2, International data transmission services and optional user facilities in public data networks
- 85-1658 CCITT Recommendation Fascicle VIII.2, X.3, Packet assembly/disassembly facility (PAD) in a public data network
- 85-1659 CCITT Recommendation Fascicle VIII.2?, X.4, General structure of signals of international
- 85-1660 CCITT Recommendation Fascicle VIII.2, X.10, Categories of access for data terminal equipment
- 85-1661 CCITT Recommendation Fascicle VIII.2, X.15, Definitions of terms concerning public data networks
- 85-1662 CCITT Recommendation Fascicle III.5, I.110, Frame of I-series recommendations terminology, Section 1
- 85-1663 CCITT Recommendation Fascicle III.5, I.112, Vocabulary of terms for ISDNs
- 85-1664 CCITT Recommendation Fascicle III.5, I.112, Vocabulary of terms for ISDNs
- 85-1665 CCITT Recommendation Fascicle III.5, I.120, Description of ISDNs, Section 2
- 85-1666 CCITT Recommendation Fascicle III.5, I.130, General modeling methods, Attributes for the characterization of telecommunication services supported by an ISDN and network capabilities of an ISDN, Section 3
- 85-1667 CCITT Recommendation Fascicle III.5, I.210, Service aspects of ISDN, Principles of telecommunication services supported by an ISDN, Section 1
- 85-1668 CCITT Recommendation Fascicle III.5, I.211, Bearer services supported by an ISDN
- 85-1669 CCITT Recommendation Fascicle III.5, I.212, Teleservices supported by an ISDN
- 85-1670 CCITT Recommendation Fascicle III.5, I.310, ISDN – Network functional principles, Section 3
- 85-1671 CCITT Recommendation Fascicle III.5, I.320, Reference models, ISDN protocol reference model, Section 2
- 85-1672 CCITT Recommendation Fascicle III.5, I.320, Numbering, addressing and routing, ISDN numbering
- 85-1673 CCITT Recommendation Fascicle III.5, I.331, Numbering plan for the ISDN era
- 85-1674 CCITT Recommendation Fascicle VIII.4, X.50 bis, Fundamental parameters of a 48-kbit/s user data

- 85-1675 CCITT Recommendation Fascicle VIII.4, X.51, Fundamental parameters of a multiplexing scheme for
- 85-1676 CCITT Recommendation Fascicle VIII.4, X.51 bis, Fundamental parameters of a 48-kbit/s user data
- 85-1677 CCITT Recommendation Fascicle VIII.4, X.52, Method of encoding anisynchronous signals into
- 85-1678 CCITT Recommendation Fascicle VIII.4, X.51, Annex A (to Recommendation X.52), Location of the encoder
- 85-1679 CCITT Recommendation Fascicle VIII.4, X.54, Allocation of channels on international multiplex links at 64 kbits/s
- 85-1680 CCITT Recommendation Fascicle VIII.4, X.55, Interface between synchronous data networks using a 6 – 2 envelope structure and single channel per carrier (SCPC) satellite channels
- 85-1681 CCITT Recommendation Fascicle VII.3, T.90, Teletex requirements for interworking with the Telex service
- 85-1682 CCITT Recommendation Fascicle VII.3, T.91, Teletex requirements for real-time interworking with the Telex service in a packet-switching network environment
- 85-1683 CCITT Recommendation Fascicle VII.3, T.101, International interworking for videotext services
- 85-1684 CCITT Recommendation Fascicle II.5, I.3, Protection of the common names of CCITT defines international public services
- 85-1685 CCITT Recommendation Fascicle II.5, F.160, Public facsimile service, General operational provisions for the international public facsimile services, Section 1
- 85-1686 CCITT Recommendation Fascicle II.5, F.161, International facsimile service between subscribers with
- 85-1687 CCITT Recommendation Fascicle II.5, F.162, Operational requirements of an international store-and-forward and facsimile switching service
- 85-1688 CCITT Recommendation Fascicle II.5, F.170, Operational provisions for the international public facsimile service between public bureaux (Bureaufax)
- 85-1689 CCITT Recommendation Fascicle II.4, F.180, Operational provisions for the international public facsimile service between subscribers' stations
- 85-1690 CCITT Recommendation Fascicle II.5, F.200, Teletex service, Section 2
- 85-1691 CCITT Recommendation Fascicle II.4, F.190, Operational provisions for the international facsimile service between public bureaux and subscriber stations and vice versa
- 85-1692 CCITT Recommendation Fascicle II.5, F.201, Interworking between the Teletex service and the Telex service
- 85-1693 CCITT Recommendation Fascicle II.5, F.300, Videotex service, Section 3
- 85-1694 CCITT Recommendation Fascicle VII.3, T.71, LAPB extended for

- half-duplex physical level facility
- 85-1695 CCITT Recommendation Fascicle VII.3, T.72, Terminal capabilities for mixed mode of operation
- 85-1696 CCITT Recommendation Fascicle VII.3, T.63, Provisions for verification of Teletex terminal compliance

87-3374 Pacific MILNET geographic maps, Jan., Apr., Jul., and Oct. 1987

87-3375 ARPANET logical maps, Jan., Apr., Jul., and Oct. 1987

87-3376 MILNET logical maps, Jan., Apr., Jul., and Oct. 1987

87-3377 European MILNET logical maps, Jan., Apr., Jul., and Oct. 1987

87-3378 Pacific MILNET logical maps, Jan., Apr., Jul., and Oct. 1987

87-3379 DISNET geographic maps, Apr., Jul. 1987

87-3389 Project Athena technical plan, Section E.2.1, Kerberos authentication and authorization system, NISTD/R/89-07-10

87-3394 MILNET TAC access user registration procedures, Summary Rept, SRI Proj. 7326

87-3399 NETBIOS for ISO networks

87-3491 ISO 8825, 1st ed., 1987-11-15, Information processing systems – Open systems interconnection – Specification of basic encoding rules for abstract syntax notation one (ASN.1)

87-3513 Data network research program, Executive summary, Newton-Evans Res. Co., Inc., Aug. 1987

87-3515 Domain Name System, Slide presentation, Mitre Corp., Jul. 30, 1987

88-1273 Transition and coexistence strategies for TCP/IP to OSI

88-1279 GOSIP to govern federal nets

- 88-1666 A delay-based approach for congestion avoidance in interconnected heterogeneous computer networks
- 88-2017 ISO international standard ISO/DIS 9594 and CCITT X.500, Information processing systems –
- 88-2411 GOSIP to set DoD on path to commercial standards
- 88-2412 Rallying round the standard(s)
- 88-2417 Gordon Bell call for a U.S. research network
- 88-2418 SCRIBE – The user's role in standardization progress
- 88-2419 Interconnection of two message handling systems based on CCITT X.400 series recommendations
- 88-2420 Development and interconnection of X.400 message handling system
- 88-2421 High speed, broadband communications and OSI
- 88-2422 Strategies for Open Systems Interconnection in Canada
- 88-2423 Establishment of conformance test services in Europe
- 88-2424 The EUREKA project "Cooperation for Open Systems Interconnection networking in Europe (COSINE)
- 88-2425 Inferencing syntax converter: A promising OSI presentation layer facility
- 88-2426 Necessary functions of institutions for test and certification from the viewpoint of users in IT
- 88-2427 Why users must co-operate internationally on standardization
- 88-2428 Management of distributed communicating systems
- 88-2429 User investigation into practical systems
- 88-2430 Open network architecture: British Telecom's approach to OSI
- 88-2431 Advances in OSI conformance testing in the UK and ISO
- 88-2432 UK government policy on OSI
- 88-2433 An OSI communication system for the public administration of the state Nordrhein-Westfalen
- 88-2434 GENEPX400 – A test system for X.400 based message handling systems
- 88-2435 The OSIRIDE directory system: Status and perspectives
- 88-2436 Open systems interconnection (OSI): Status, trends and European information technology manufacturer' activities
- 88-2437 The Dutch interbank computer network
- 88-2438 MAP progress for Europe
- 88-2439 Security in the OSI model
- 88-2440 Recent developments and strategies in France
- 88-2441 Network management in an OSI environment
- 88-2442 Japanese strategies on OSI
- 88-2443 IT certification in Europe
- 88-2444 The purchaser's view of functional standards
- 88-2445 U.S. government procurement of open systems products and services
- 88-2450 User-process communication performance in networks of computers

88-2454 Looking ahead: Network planning for the 1990s
 88-2455 COS fiddles with testers while OSI vendors burn
 88-2457 MIL-STD-1780, DCEC Protocol Laboratory file transfer protocol
 (FTP) MIL-STD-1780 certification tests index
 88-2460 MIL-STD-1782, DCEC Protocol Laboratory TELNET protocol
 (TELNET) MIL-STD-1782 certification tests index
 88-2471 An overview of formally specified multi-layered test systems,
 X3T5:1 Conformance Testing Group, Natl. Bur. Stds ICST
 88-2499 Standards for OSI – Present status, future plans
 88-2583 DDN Management Bulletin No. 38
 88-2584 Government locks into OSI standards in March
 88-2590 Upper layers: From bizarre to bazaar
 88-2592 OSI's final frontier: The application layer
 88-2600 MAP reference specification, manufacturing automation protocol,
 developed by World Federation of MAP Users Group
 88-2601 SONET: An international standard
 88-2604 TCP/IP still rules federal nets
 88-2605 Posix-standard systems get green light overseas
 88-2606 Planning security in the midst of GOSIP
 88-2615 DDN Management Bulletin No. 39
 88-2624 Can information systems professionals afford to ignore OSI??
 88-2626 Network audit-trail reporting system specifications, SRI
 International, Draft Report
 88-2627 NIC network server system descriptions, SRI International, Draft
 Report
 88-2628 Network usage-data collection and reporting system specifications,
 SRI International, Draft Report
 88-2630 Private network gateways to public network services
 88-2631 Can packet switching survive ISDN and fiber?
 88-2632 Comments on Aydin Systems users guide for the MTAC terminal
 access controller, SRI International
 88-2634 The argument for hybrid X.25 networks
 88-2635 The strategic implications of open network architecture
 88-2636 The future of the public network: From the Star to the Matrix
 88-2637 DDN Management Bulletin No. 40
 88-2638 DDN protocol implementations and vendors guide, SRI
 International, NIC-50002
 88-2641 Open systems interconnection: The future prospects
 88-2643 DDN Newsletter No. 55
 88-2645 DCA Request for review of the User's Guide for the [Aydin] MTAC
 terminal access controller
 88-2648 Network audit-trail reporting system operations manual, SRI
 International, Draft Report
