

This document refers to a box of technical reports in the Computer History Museum's collection, described under catalog number 102748588.

The following technical reports in this box have accompanying descriptions:

On-line-assistance OLA iterative and formal tests

"The on-line-assistance (OLA) product is described in this report. The human factors guidelines used in designing the interface are presented."

Office taxonomy initial model

"This report presents both a review of the literature in the area of model of office behavior and one type of such model, a workload model. Also included are various data useful in extending this model, or of use for other purposes."

Evaluation of arrow keys and Apple's Lisa mouse for text selection

"Twelve people participated in a study comparing Apple's Lisa mouse and the inverted-T arrow keys on a VT100 for text selection; this report discusses the study and its results."

Word processing survey

"This document is intended to provide the reader with summary descriptions of word processing packages, available now and during FY 1984, for internal use."

User performance with command menu and iconic interfaces

"This report describes a comparison of eleven different interactive software systems with respect to ease of use. In addition to studying different systems, users with different amounts of general and specific computer experience were also studied."
