This document refers to a box of technical reports in the Computer History Museum's collection, described under catalog number 102748598.

The following technical reports in this box have accompanying descriptions:

Network and communications and IO overview and product descriptions
"Explains how Digital's Ethernet-related products fit together. There is an overview of Digital's networking structure, and lots of detailed explanations of DEC products."

VAXclusters quality study
"This report contains the findings of a quality study of VAXclusters for the VAXcluster program office. It shows that clustering provides a significant increase in capability to the VAX/VMS family."

VAXstation II quality study
"This study of 100 VAXstation II customers reveals that the product met their requirements on most dimensions, even though their overall satisfaction with the product was only moderate."
