— THE CINCOM STORY —

The World's Most Experienced Software Company®

Cincom Systems is a true pioneer in the software industry, providing innovative software solutions and services for our clients since our founding in 1968 by Thomas M. Nies, current President and longest-serving CEO in the computer industry.

Cincom has always measured its success by the success of our clients. And those client successes have been very significant. Cincom's focus has always been on delivering high value, at very low cost, which generates rapid ROI and very minimum risk for our clients. These systems of proven, quick, successful implementations have been giving some of the highest value and some of the most powerful benefits and advantages in the software industry.

We've found that for every dollar our clients have invested with Cincom, they're generating at least 10 to 20 dollars worth of return, and some are realizing a lot more value than that.

Cincom solutions deliver sustainable increases in productivity and ongoing value over the years, which provide great competitive advantage for our clients around the world.

Cincom strives to be the lowest-cost provider while at the same time delivering the highest value. Proven performance, that's our track record; "whatever it takes," that's our service motto. We do what's best for our clients, and our clients are among the most successful in the industry. We invite you to consider Cincom for your software and services needs.
