

# NEW FROM CINCOM: THE MANAGE USER SERIES™... MAINFRAME PERSONAL COMPUTING POWER WITH DP CONTROL.

## MANAGE USER SERIES

Cincom's new MANAGE USER SERIES™ combines the benefits of personal computing capability, mainframe power and greater data processing control into one comprehensive Decision Support System.

### Personal Computing On The Mainframe

Simply explained, the MANAGE USER SERIES is Cincom's family of integrated mainframe software tools that work together as one powerful Decision Support System. No other software vendor offers such a wide range of Decision Support capabilities at the mainframe level.

Using the power and accessibility of the mainframe, MANAGE enables data processing to provide a wide range of personal computing capabilities while maintaining control over the corporate data resource. And because MANAGE has a conversational, user-friendly personality, it easily wins friends among end-users.

### Powerful Decision Support Tools

The MANAGE USER SERIES currently integrates four powerful tools that allow end-users to access, store and use production information from the corporate mainframe to aid in key business decision making:

- MANTIS is a sophisticated free-form text processing system that enables users to access corporate files for the creation of business documents and corporate mailings.
- MANGRAF is an advanced business graphics tool that provides output from on-line applications using centralized production data base information.
- MANCALC is a 3-Dimensional electronic spreadsheet that facilitates "corporate-size" models and can automatically load information stored in

corporate files, or build models based on private data as well.

- MANTIS is Cincom's industry acclaimed application development language. As the "integrator" of the MANAGE USER SERIES, MANTIS provides an effective bridge between the Development Center and the Information Center.

### End-User Productivity Through Integration

The key to the power and versatility of MANAGE is its elegant integration. MANAGE provides the tools needed for preparation of business reports and day-to-day decision making. And because all components of MANAGE can access central or personal data files, users can merge a multitude of data types, display them graphically, simulate "what-if" futures and document the findings in one business report. The power of MANAGE is limited only by one's own creativity.

### Another Major Cincom Technology

Like TIS™ ULTRA Interactive Data Base System™, MRPS™ and MANTIS™, MANAGE USER SERIES is a member of the integrated family of new Cincom software technologies. From data base to application software to Decision Support, the name Cincom has come to stand for excellence in software technology the world over.

MANTIS - Text Processing

MANCALC - Spreadsheet
