One Integrated Solution.

Welcome To THE
CASE ENVIRONMENT.™

The Cincom Advanced Software Engineering Environment: the integrated solution to your CASE needs.

Use it as a complete set. Or choose individual

components. THE CASE ENVIRONMENT is your superior all-purpose CASE tool kit: because it's the flexible way to make application design, development, and maintenance faster. Easier. And more cost-effective: whether you use PCs, minis, or mainframes. On IBM®, Digital™, or other platforms. With IMS, DB2, another DBMS—or no DBMS at all.

Using advanced software engineering principles, THE CASE ENVIRONMENT combines MANTIS, our proven development system, with a complete set of the best CASE technology tools. Together, they create a development environment for the entire application life cycle: from requirements planning through implementation and maintenance—including documentation and project management. Individually, their flexible modularity lets you

build your own environment over time, using only the tools you need.

And because of its open architecture, THE CASE ENVIRONMENT integrates with tools you already have—like CASE workstations, word processors, and desktop publishers. Plus, every application you develop is portable, without change, across a wide range of platforms.

The best CASE tools: integrated. Modular. Flexible.
For application development in a variety of environments, welcome to THE CASE ENVIRONMENT.
