

CONTROL: Manufacturing from CINCOM

CONTROL: Manufacturing opens your window of opportunity in today's global marketplace.

You know you need better manufacturing and financial information systems to win against global competition. You also know that the future of computing is in Open Systems. But how can you risk your business on software and vendors that haven't been proven in companies like yours?

Fortunately, you don't have to. CONTROL: Manufacturing™ (C:M) is a comprehensive business system that is already proven worldwide. Its advanced requestor/server architecture is a bridge to Open Systems, even as those standards and

technologies evolve. What's more, C:M gives you ease of use, connectivity and hardware independence, all in a cost effective solution.

C:M is available on UNIX and other server platforms from DIGITAL, Hewlett-Packard, and IBM with GUI desktop functions on PCs and MACs.

Hundreds of leading manufacturers are improving their competitive performance using C:M. And you can, too. Just call 1-800-543-3010 for more information.
