

SANTA CLARA, Calif., September 14, 1976 - The Memorex 3650 direct-access Storage Subsystem provides full feature compatibility with the IBM 3350. In addition, optional Memorex-supplied software packages are available for both Compatibility and Native Modes operation of the 3650 Subsystem under OS/370 and DOS/VS operating systems.

Thus, the 3650 has the ability to read and write in any one of three formats: 3650 Native Mode (317.5Mb), 3670 Compatibility Mode (two times 100Mb), and 3675 Compatibility Mode (200Mb). These formats may be specified on a drive by drive basis, and may be either field or plant installed.
