INTRODUCTION

This publication is intended to make members of the Systems and Procedures Association more conscious of the employment of Decision Tables as a systems technique in analyzing, documenting, programming, in training of personnel, as an operations reference, and as direct input to a computer program (or compiler). The objective is to stimulate members to fully investigate the possible usage of Decision Tables in their systems and procedures work.

This survey was planned, organized and implemented by the Southeastern Michigan SPA Research Committee (Jim Thomson, Ann Arbor; Lynn Wilson, North Detroit; and Chairman Jerry Heyer, Detroit), with the support of SPA's International Research Committee.

Frank Goelz, Chairman

1966-67 International Research Committee

SURVEY OBJECTIVES

1. To determine the extent of Decision Table usage:
 - a. Are they used in all areas of Canada, the United States and the Free World?
 - b. Is usage limited to particular types of business?
 - c. Does usage directly correlate to the size of the Systems and Procedures staff?
2. To discover the degree of knowledge of systems people regarding Decision Tables in general.
3. To determine the interest of SPA members in learning more about Decision Tables and their utilization.
4. To learn the reasons why Decision Tables are not fully employed at present.
5. To identify the sources of information on Decision Tables.
6. To discover in what phases of systems and procedures work Decision Tables are being used.
7. To document applications currently employing Decision Tables.

SURVEY SAMPLING

A questionnaire, "Survey on Use of Decision Tables in the Systems & Procedures Function", was mailed with a covering letter to over 5,800 SPA members throughout Canada and the U. S., and to other SPA members throughout the world. The questionnaire covered three basic categories related to Decision Tables:

- Familiarity with Decision Tables
- Acceptance of Decision Tables
- Application of Decision Tables

Replies to the questionnaire numbered over 2,000 or one-third of the SPA membership. These responses reflected the experience of the members of all SPA Chapters as well as a broad distribution of non-chapter members.

Replies were received from Australia, Canada, Columbia, England, Hawaii, the Netherlands, Mexico, the Philippines and the U. S.

Observation 1: Use of Decision Tables is well dispersed in Canada, U. S. and throughout the world.

WHAT IS A DECISION TABLE?

Decision Table usage is becoming more widespread yearly. But approximately 50% of the systems men surveyed in this publication have never used them—for varying reasons, including the lack of an instruction manual. To answer the question, "What is a Decision Table?", we present the following excerpt from "The Development and Analysis of Decision Tables," by Solomon L. Pollack. Mr. Pollack's article appeared in the 1964 "Ideas for Management", published by the Systems and Procedures Association.

"Throughout business systems, and for many scientific problems, a series of actions is taken only when a set of conditions is satisfied. The expression that describes the conditions and actions is called a Decision Rule. Decision rules can be written in any language and in any form as long as they are intelligible. A popular method of expression is by means of flow charts. . . .

"The flow chart technique has serious defects, however. First, the charts are difficult to draw because of the symbols and spacing. Second, they are difficult to comprehend, in that it is hard to follow the exact path of a series of conditions and actions through the charts. Third, it is difficult to determine whether the charts cover all possible cases. And fourth, it is hard to insure the specification of the same series of actions for a particular set of conditions. These same drawbacks apply in a larger degree to the free-form English used to describe the decision rules.

"The need for faster and better communication and analysis had led to the development of Decision Tables, structures for describing a set of decision rules. Computer languages, adapted for decision tables, have been developed for describing and processing scientific and business problems. Examples in the scientific area are FORTAB and STRUCTURE TABLE LANGUAGE, while the business area has TABSOL and DETAB-X."

"Systems analysts and programmers can use decision tables to describe the decision rules for their business data processing systems or for their scientific problems. . . ."

FAMILIARITY

TABLE I: OVERALL FAMILIARITY WITH DECISION TABLES

Type of Economic Activity	Have Used Them		Know How to Use Them		Know What They Are		Have Heard of Them		Have Not Heard of Them		Total Response
		%		%		%		%		%	
Manufacturing ...	381	38	165	17	266	27	143	14	35	4	990
Finance	112	36	39	13	102	33	44	14	14	4	311
Trading	37	35	20	19	32	30	7	7	10	9	106
Utilities	58	39	26	17	41	27	25	17	—	—	150
Consultants	82	47	45	26	34	20	5	3	7	4	173
Government	46	35	27	20	28	21	26	20	5	4	132
Education	19	29	15	22	19	29	12	18	2	2	67
(Other)	26	32	5	6	23	29	19	24	7	9	80
Total	761	38	342	17	545	27	281	14	80	4	2009

Observation 2: Decision Table familiarity/use is not limited to particular types of economic activity. Decision Tables have made significant inroads in all types of business.

FAMILIARITY

TABLE II: USE/KNOWLEDGE OF DECISION TABLES

Type of Economic Activity (Ranged)	(1) % That Have Used Decision Tables	(2) % That Know How To Use Them (Without Using Them)	(1 & 2) % That Either Use or Know How To Use
Consultants	47	26	73
Manufacturing	39	17	56
Utilities	39	17	56
Finance	36	13	49
Trading	35	19	54
Government	35	21	56
Education	28	22	50
(Other)	33	6	39

Observation 3: Consultants lead in usage with 47%. Most of these classifications reflect 50% usage or knowledge of how to use Decision Tables. Actual usage is concentrated between 30 and 40%.

SOURCES OF KNOWLEDGE ON DECISION TABLES

Observation 4: Many sources for information on Decision Tables do exist. Principal sources are:

- a. Magazines (see Bibliography)
- b. Books (see Bibliography)
- c. Seminars—Associations, Equipment Manufacturers, and Outside Consultants.
- d. Other—Fellow analysts and school courses.

FAMILIARITY

TABLE III: INSTRUCTION MANUAL

Need For Instruction Manual On Decision Tables:

Yes	No	No Response
1749 (87%)	144 (7%)	116

Observation 5: An overwhelming 87% in all types of business collectively feel the need for a Decision Tables Instruction Manual.

Conclusion: This high percentage may result from unfamiliarity with available reference literature.

ACCEPTANCE

**TABLE IV: DECISION TABLE UTILIZATION
BY TYPE OF ECONOMIC ACTIVITY**

Type of Economic Activity	Use Is Standard Practice		Use Is At Discretion of Individual Analyst		Have Not Used	Have Discontinued Use		Total Response	
	%		%			%	%		
Manufacturing	49	5	498	50	436	44	7	1	990
Finance	16	5	103	33	189	61	3	1	311
Trading	—	—	39	37	67	63	—	—	106
Utilities	19	13	64	42	65	43	2	1	150
Consultants	13	8	97	56	63	36	—	—	173
Government	4	3	61	46	65	49	2	2	132
Education	8	12	14	21	45	67	—	—	67
(Other)	7	9	17	21	56	70	—	—	80
Total	116	6	893	44	986	49	14	1	2009

Observation 6: Use of Decision Tables is not mandatory. The leaders in "standard practice" are Utilities and Education. The greatest penetration is where usage is at the individual analyst's discretion, with Manufacturing and Consultants reporting 50% or higher. The minimum in this category shows 20% usage.

Conclusion: An acceptance of Decision Tables as a usable technique by over 50% of those responding indicates that Decision Tables are gaining popularity.

ACCEPTANCE

TABLE V: DECISION TABLE UTILIZATION IN PROPORTION TO SIZE OF SYSTEMS STAFF

No. of Analysts in Group	Use Is Standard Practice		Use Is At Discretion of Individual Analyst		Have Not Used		Have Discontinued Use		Total Response
		%		%		%		%	
1-5	44	4	400	37	615	58	8	1	1067
6-10	25	7	190	53	139	39	3	1	357
11-over	38	10	234	60	114	29	2	1	388
Not Classified	9	—	69	—	118	—	1	—	197
Total	116	6	893	44	986	49	14	1	2009

Observation 7: Systems group with 1-5 analysts—40% use; 60% do not use.
 Systems group with 6-10 analysts—60% use; 40% do not use.
 Systems group with more than 10 analysts—70% use; 30% do not.

Conclusion: The larger the systems group, the more likely analysts are to make use of Decision Tables.

ACCEPTANCE

TABLE VI: NON-USAGE OF DECISION TABLES WITHIN ECONOMIC ACTIVITIES

Type of Economic Activity	% That "Have Not Used" Decision Tables
Education	67
Trading	63
Finance	60
Government	49
Manufacturing	44
Utilities	43
Consultants	36
(Other)	70

TABLE VII: NON-USAGE OF DECISION TABLES WITHIN SYSTEMS GROUPS

Size of S & P Groups	Have Not Used Decision Tables	
	Analysts	%
1-5	615	58
6-10	139	39
11-over	114	29
No Entry	118	60
Total	986	49

Observation 8: Approximately 50% of systems men have not used Decision Tables.

ACCEPTANCE

Reasons Cited For Non-Usage of Decision Tables:

1. No need and/or value demonstrated.
 - "Do not have the necessary equipment."
 - "More trouble to establish than they are worth."
 - "Simply not needed."
 - "Not sufficient complexity to require their use."
 - "Never thought about it."
 - "Other techniques do the same job."
2. Lack of exposure to and/or experience with DT's.
 - "Insufficient training material available."
 - "Staff not familiar with them."
 - "Workload prevents experimentation."
 - "Never have tried them."
 - "Standard method not defined."
3. Too complicated, detailed, and/or time-consuming.
 - "Degree of detail prohibitive."
 - "Cumbersome."
4. Prefer other techniques.
 - "Analysts revert to flow charts."
5. Not conducive for applications.
 - "Difficult when problems contain many constraints."
 - "Operating people do not understand."
 - "Style format for procedures precludes use."
 - "Each analyst allowed to use own means."

Observation 9: Generally, the failure to use Decision Tables resulted from lack of familiarity or actual experience.

Conclusion: An instruction manual, or a greater exposure to, or experience with, application details of Decision Tables technique would ameliorate this.

APPLICATION

TABLE VIII: GENERAL APPLICATION BY ECONOMIC ACTIVITY

Type of Economic Activity	In Documenting An Existing System		As Substitute for Flow Charts		As Substitute for, or Clarification of, Flow Charts		Written Procedure for Computer Programmers		Written Procedure for Daily Reference by Operating Personnel		Written Procedure for Training Employees		As a Direct Input to a Computer or Compiler		Total Response
		%		%		%		%		%		%		%	
Manufacturing	213	22	167	17	339	34	311	31	112	11	69	7	71	7	990
Finance	48	15	38	12	79	25	73	24	33	11	22	7	11	4	311
Trading	20	19	12	11	34	32	27	26	10	9	11	10	6	6	106
Utilities	34	23	25	17	49	33	40	27	22	15	14	9	15	10	150
Consultants	47	27	24	14	81	47	65	38	27	16	22	13	15	9	173
Government	18	14	12	9	42	32	30	23	16	12	11	8	5	4	132
Education	10	15	5	8	13	19	11	16	5	8	9	13	3	5	67
(Other)	12	15	11	14	19	24	16	20	6	8	1	1	1	1	80
Total	402	20	294	15	656	33	573	29	231	12	159	8	127	6	2009

APPLICATION

Observation 10: Overall, 20% currently use Decision Tables to document a system. Almost a third (32.7%) use Decision Tables in conjunction with flow charts. 28.5% use Decision Tables for instruction to computer programmers. 7.9% use Decision Tables in the training of employees. 11.5% use Decision Tables for day-to-day reference by operation personnel. Only 6.3% use Decision Tables as a direct input to computer program or compiler. The Manufacturing, Utilities and Consultant fields generally lead in Decision Table applications.

Conclusion: All economic activities employ Decision Tables in these general uses, but in varying degree.

Observation 11: Applications fall into three types—analysis, actual procedures and program documentation. An almost unlimited variety of applications using Decision Tables have already been put into operation.

The years 1964-67 have been the most fruitful years for Decision Table use. The applications each successive year nearly doubled that of the prior year.

APPLICATION

Attached is a listing of specific applications which employ Decision Tables:

ACCOUNTING

Decision Table applications in this area of activity include:	ACCOUNTING				ACCOUNTING		
	Analysis	Procedure	Program Documentation		Analysis	Procedure	Program Documentation
Accounts Payable	x	x		Escrow Account Analysis	x		
Accounts Receivable	x	x	x	Expense Allocations	x	x	x
Accounts Receivables Statements		x		Expense Distribution Edit		x	
Analysis of Loan Status Cards	x	x		Expense Ledger	x		
Analysis of Vendors	x			Financial Analysis	x		
Annuity Classification	x			Financial Operating Plan	x		x
Applying Construction Charges		x		Freight Demurrage Calculations	x	x	
Appropriation Procedures	x	x		Freight Rates Calculations		x	
Assignment of Commission Credit		x		General Accounting			x
Automatic Premium Loan Repayment	x			General Ledger	x		
Billing and Billing Adjustments	x	x	x	Government Bond Purchase		x	
Billing Brackets			x	Handling Fee Reports			x
Brokerage Calculations	x			Hospital Accounting	x		x
Budget Program			x	Interest on Loans		x	
Building Standard Costs	x		x	Installment Loans	x	x	x
Capital Equipment Projects	x			Insurance Claims (input)	x	x	
Capital Stock		x		Insurance Rates	x	x	
Cash Application	x	x		Insurance Rate Formula		x	
Cash Disbursements	x	x		Investments	x	x	
Chart of Accounts				Job Cost	x		
Validity Check		x		Job Cost Distribution	x	x	
Check Writing	x	x		Journal Converted to General Accounts	x	x	
Collection Follow-Up	x			Labor Reporting	x		
Compute Service Charges	x			Labor Standards	x		
Commercial Loan Accounting	x			Liabilities at Term		x	
Commission Accounting	x			Master Vendor No. Assignment	x		
Computer Audit of Invoices (Frt Application)		x		Material Accounting	x	x	
Cost Accounting		x	x	Merged Accountability & Fund Reporting		x	x
Cost Analysis	x	x		MICR Check Reconciliation		x	
Cost Estimating		x		Natural Gas Accounting	x	x	
Cost File Maintenance	x			Overhead Analysis	x		
Credit Analysis & Rating	x			Pension Fund			x
Credit Letter Writing		x		Preparation of Quarterly Tape for Social Security	x		
Dealer Financing	x	x		Pre-Underwriting			x
Demand Deposits	x	x		Product Costs			x
Depreciation-Book and Tax		x		Production Accounting	x		
Determination of Freight Allowances		x		Product Tax Rebating		x	
Discount Determination	x			Property Cost Control	x		
Effective Rate Table				Real Estate Billing		x	
Maintenance		x		Retired Pay System		x	

ACCOUNTING (Continued)

DECISION TABLES: PRINCIPLES AND APPLICATIONS

Washington, D. C.
September 14-15

New York, N. Y.
September 21-22

A two-day seminar for computer programmers and systems analysts. Lecture and exercises provide instruction on practical application of the decision table technique. Registration fee: \$150 for one student, and \$100 each for one or two additional students from the same organization. Includes lunches and course materials.

WASHINGTON COURSE

**Linden Hill Hotel
5400 Pooks Hill Road
(Wisconsin Avenue at
the Capital Beltway)
Bethesda, Maryland 20014
(301) 656-0300**

NEW YORK COURSE

**St. Moritz Hotel
50 Central Park South
(On Central Park at
Avenue of the Americas)
New York, New York 10019
(212) PLaza 5-5800**

data processing seminar

DECISION TABLES: PRINCIPLES AND APPLICATIONS

COURSE OBJECTIVE: Lectures and class exercises provide the programmer or systems analyst with the skills needed to make practical application of the decision tables technique.

COURSE OUTLINE

INTRODUCTION TO DECISION TABLE LOGIC

Decision Table Structure

Conventions and Terminology

- Limited Entries
- Extended Entries
- Else Rule
- Segmentation of Tabular Logic
- Open and Closed Tables
- Recursive Table Usage
- Controlling Table Size

Class Problems

THE USE OF DECISION TABLES IN SYSTEMS DEVELOPMENT

Decision Tables and Systems Studies

Decision Tables in Systems Analysis

- Verification of Problem Statement
- Detection of Missing Elements of a Problem
- Decision Tables and System Documentation
- Decision Tables and User Communication

THE USE OF DECISION TABLES IN PROGRAMMING

Tabular Statement of Program Specification

Manual Coding from Tables

- Scanning
- Condition Testing
- The Impact of Condition Frequency Analysis

Compiler Conversion of Decision Tables to Language Statements

GUIDELINES FOR USING TABLES IN AN INSTALLATION

CASE STUDY PROBLEM

INSTRUCTOR

**Herbert B. Lassiter, Senior Consultant
Brandon Applied Systems, Inc.**

In his nine years in data processing Mr. Lassiter has served as senior consultant, systems engineer, and data processing instructor. He has supervised systems design and programming activities, and the implementation of systems for both commercial and government organizations. Mr. Lassiter has recommended and installed data processing standards, instituted successful organizational changes connected with data processing use, and has acted as advisor to management of large computer installations.

REGISTRATION AND FEES

To register, write or phone the Registrar, Brandon Systems Institute, at the Washington or New York address listed below. Fees, including luncheons and course materials, are \$150 for one student, and \$100 each for one or two additional students from the same organization.

SEMINAR LOCATIONS

Washington: The Linden Hill Hotel is holding a block of rooms for student registration at \$13 a night. It is located near the intersection of the Capital Beltway (I-495) and Wisconsin Avenue, at 5400 Pooks Hill Road, Bethesda, Maryland, (301) 656-0300. Free parking is provided. Limousine and cab service is available from Washington airports.

New York: The Hotel St. Moritz is holding a block of rooms for student registration. Rates are \$14-to-\$21 for single rooms. The hotel is at 50 Central Park South, New York, N.Y., (212) PLaza 5-5800.

IN OCTOBER: THREE NEW, ONE-DAY SEMINARS

	Washington	New York
Data Base Management Systems and Program	Oct. 2	Oct. 23
Testing	Oct. 3	Oct. 24
Documentation Standards	Oct. 4	Oct. 25

For an outline of these and other courses in the current program, write:
