COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.

COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.

Table with columns: Machine, Description, Relative Perf. Approx. (MIPS), Approx. Initial Purchase, Min. Maint., 1st Ship, Lease Rate, Term, Lease Rate, Term, Sell To End User, Buy From End User. Includes sub-header '3RD PARTY' and 'IBM z196 EC 2817 Series'.

Configuration table with columns: MODEL, MAX ACTIVE, MEMORY, OPTIONS, CHANNELS, COUPLING LINKS. Includes options like 'M15 (1 BOOK)', 'M32 (2 BOOKS)', 'M49 (3 BOOKS)'. Channel options include 'ESCON/FICON EXPRESS/ FICON EXPRESS4', 'OSA-EXPRESS3/OSA-EXPRESS2'. Coupling links include 'ISC-3', 'IC', 'INFINIBAND'.

COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.

COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.

COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.

COMPUTER PRICE WATCH

**Computer Price Watch is a copyrighted publication.
Federal law strictly prohibits reproduction without permission from Computer Information Resources.**

The information contained in this document represents vendor list prices and averages of current 3rd party prices, both lease and purchase, for the primary IBM and compatible intermediate to large system products. It has been compiled from sources in the industry which we deem reliable. However, we do not represent that it is accurate and complete and it should not be relied upon as the exact price for which you can buy or sell these products. Many factors such as early termination clauses, equipment availability, and interest rates, affect the actual price of any 3rd party computer product and these must be considered on an individual basis. In addition, some vendor prices may be negotiated below their list.
