

Video Plus – Add video to KIM-1, Sym65 or custom systems

Micro Plus – Video Plus with 6502 microcontroller

- State-of-the-art MOS Technology 6502 microprocessor for stand-alone use
- Up to 7K RAM and 4K EEPROM
- 6522 VIA for basic parallel and serial I/O
- Motorola 6845 video controller with programmable formats -- up to 132 characters per line and up to 30 lines
- EPROM with standard upper/lower ASCII character set or EPROM may be programmed with custom patterns
- RAM character generator for on-the-fly pattern generation
- Motorola 6551 communications controller with RS232 serial, 20 mA current loop, programmable Baud rates and parity control
- Full bit-mapped graphics capability
- Easily expandable with FLEXI PLUS and DRAM Plus
- System Monitor with AIM, KIM and SYM expansion support
- PCB is same format as the KIM-1 or SYM65
