# DRAM Plus – Memory for KIM-1, Sym65 or custom systems

- Supports 16K or 32K dynamic RAM with transparent refreshing
- Addressable in 4K segments
- Built-in EPROM programmer
- Supports 2716, 253 and 2732 EPROMS and 2332 ROM
- State-of-the-art MOS Technology 6502 microprocessor for stand-alone use
- Up to 7K RAM and 4K EEPROM
- Two 6522 VIA versatile interface adapters
- Protoype area for custom circuits
- Dual edge connectorsfor basic parallel and serial I/O
- Easily expandable with FLEXI PLUS and DRAM Plus
- Interfaces to AIM, KIM and SYM systems
- PCB is same format as the KIM-1 or SYM65

DRAM PLUS
