

Guide to the CHM packaged software collection

Creator: Computer History Museum

Dates: 1962-2003

Extent: 52.5 linear feet, 42 record cartons

Catalog number: 102785104

Collection processed by: Jack Doran and Elena Colón-Marrero, 2020

Finding aid prepared by: Sara Chabino Lott, February 2020

Sponsor: Processing of this collection was made possible through generous funding from the National Archives' National Historical Publications & Records Commission: Access to Historical Records grant.

Abstract

The CHM packaged software collection contains commercially produced software primarily for the personal computer dated between 1962 and 2003.

Administrative Information

Access Restrictions

The collection is open for research.

Publication Rights

The Computer History Museum (CHM) can only claim physical ownership of the collection. Copyright restrictions may apply and users are responsible for satisfying any claims of the copyright holder. Requests for copying and permission to publish, quote, or reproduce any portion of the Computer History Museum's collection must be obtained jointly from both the copyright holder (if applicable) and the Computer History Museum as owner of the material.

Languages

English

Physical Characteristics and Technical Requirements

The collection contains media that has not been read by CHM staff. Contact the CHM archives staff for more information.

Scope and Content of the Collection

The CHM packaged software collection contains commercially produced software programs produced by a variety of software and computing firms, including Lotus, Apple, Electronic Arts, Borland, Grid, Novell, IBM and others. The collection is a wide-ranging sample of primarily personal computer software of different kinds and different eras and includes business applications, educational programs, and games from large and small publishers. Formats are primarily 5 1/4 and 3 1/2 inch disks, with a small amount of CD-ROM, cartridges and cassette tapes, and a very few 8 inch floppy disks. The collection is arranged alphabetically by title in the container list.
