Pointing Device	2 arrows	4 arrows	Mouse	Mouse
ntegral Disks	0	1	1	2
Add-on Disks	2 to 4	1 to 3	1	0
Capacity / Disk	143 k bytes	143 k bytes	143 k bytes	850 k bytes
Slots	8	4	0	3
RS-232 ports	0	1	2	2
Other ports	Game I/O	Silentype	none	Parallel
Sound	1 bit	6 bit a/d	5 bit	Delta-mod
Clock	No	Yes (?)	Yes	Yes
C Boards	6	6	5	10

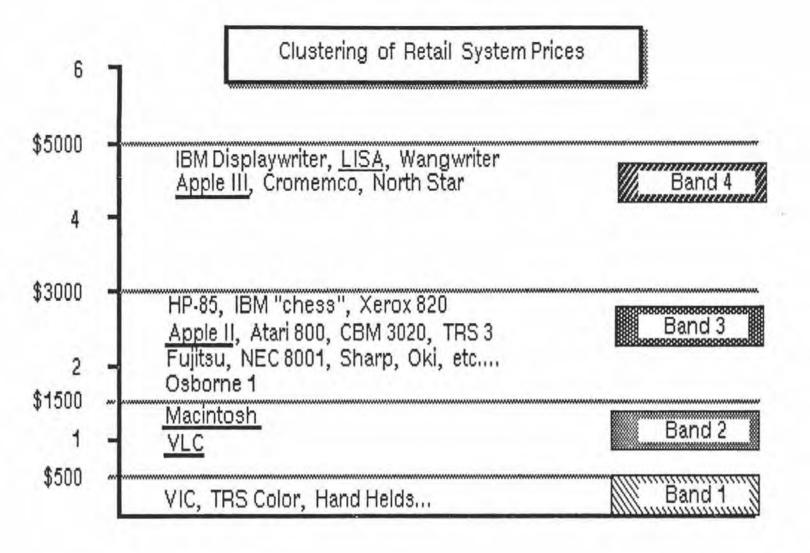

Disk Compatability Between Products

•

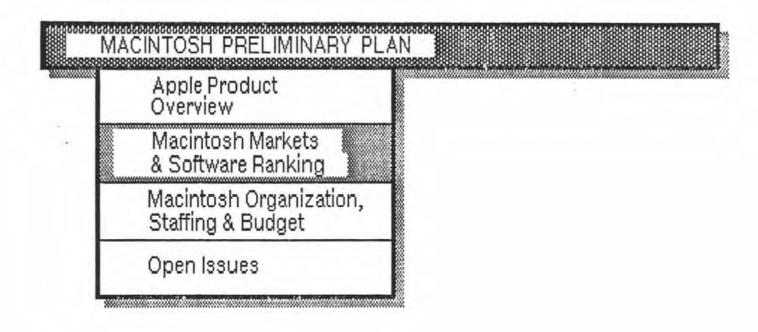

Alli 560 X 192 16K bytes .

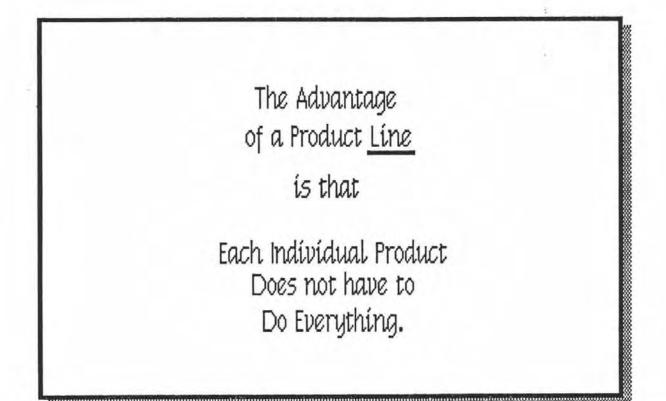

#### Notes;

Observe that everyone is introducing products in Band 3 (Apple II's band). Also, the upper end of Band 4 is really \$10-12,000 today, but I expect it to fall to the \$5000 level in '82. I expect LISA, IBM Displaywriter, Wangwriter, etc. to lower their prices to just under the \$5000 wire.

I currently know of no products being developed by competition for Band 2 (unfortunately this doesn't mean there arn't any!). One would expect serious business customers will move up to Band 4 and the job of Macintosh and VLC is to migrate the remaining Band 3 customers down to Band 2, leaving Band 3 manufacturers out in the cold!!

(and today is the first day of the rest of your life ... )

Year of introduction	1977/78	1980/81	1982	1982
current retail price	\$2000 to \$2500	\$4500	\$1000 to \$1500	\$6000 to \$7000
weight	15-30 lbs	26-40 lbs	15-18 lbs	45+ Ibs
Microprocessor	6502 (1 MHz)	6502 (2 MHz)	68000 (8 MHz)	68000 (6 MHz)
memory size	32 to 64K bytes	128 to 256K bytes	64 to 128K bytes	256 to 1,000K bytes

Macintosh Positioning

Imagine two posters next fall, the first appearing in retail dealers and Sears. The message; "Apple II has evolved into two new products, each one the best in its class and both low cost. Buy one... Or both !!"

## Notes:

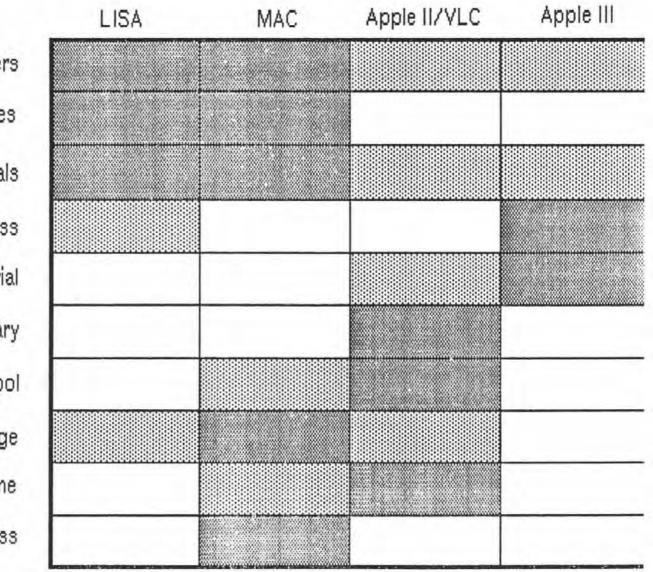

- Prices are retail prices for a "usable" system including a disk and some software, but not including a printer.
- 2. Lisa 2 is a least as powerful and runs all Lisa 1 software.
- 3. ???

is a product opportunity. Any ideas??

- Macintosh 2 runs all Mac 1 software, incorporates a flatpanel display and is physically smaller and lighter.
- Color is a product opportunity for a low-end color computer (VLC 2 ??). Any ideas??

Market Segment Emphasis

1981-1982

Open Issues

- Europe has not been given much consideration yet. Although the unit is being designed to meet VDE, etc. we still have much work to do for Europe (software, manuals, et al.)
- 2. We are designing our packaging to accept a door-less disk drive only. We feel Vennard will come through. Should we be taking this risk?
- 3. Who will manufacture Macintosh? Should we, should PCS, Singapore, Alps ???
- 4. Is our schedule realistic?
- 5. How do we get PCS to feel a "part" of Macintosh?
