

POUGHKEEPSIE

POUGHKEEPSIE  
Dept. 539, Bldg. 965  
November 5, 1958

MEMO TO: Mr. D. W. Pendery  
SUBJECT: Intermediate Level Computer

Dr. G. A. Blaauw will be chairman of the engineering group to investigate an intermediate level computer system. It is our understanding that Dr. H. G. Kolsky will be his counterpart in Product Planning. It is our intention to provide a substantial amount of support to Dr. Blaauw. Not all of this will be on a full time basis, since some of the individuals best able to contribute have other obligations which preclude them from serving full time on the committee throughout its duration.

You can expect to be advised shortly the names of the other members from engineering who will participate with Dr. Blaauw.
