Subject: Stretch Instruction Set

I understand that you plan to have a preliminary instruction set for the Los Alamos version of Stretch, made up on or before Friday, October 28, 1955. It is quite important that this material be available by that time.

It would seem that we should have a single memorandum series for the Stretch Program, which would combine the reports from all areas of the program (excepting only official Bu. Ships Reports), and suggest that the subject memo be made Stretch Memorandum #1.
