Spt 12, 57

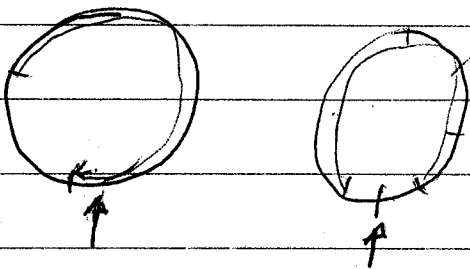

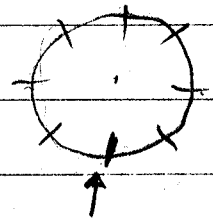

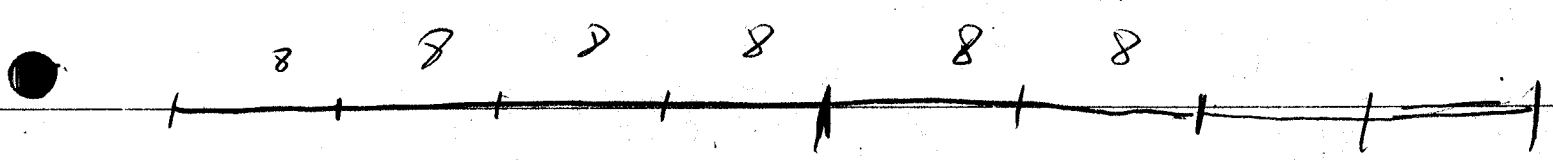

assume present scheme cont addressing from track to track
but always start at begining of block,

starting addr every 256 words in a single addressable loc.
8 around track (orig. 4)

restricted to single track? - may be able to go to next track.

- in region of fastly compute limited - buffering needed?

average read \rightarrow end

Diagram	orig scheme	Saving
	$6\frac{1}{2}$	$4\frac{1}{2}$ 16ms
	$5\frac{1}{2}$	$4\frac{1}{2}$ 8ms
	4	4 0ms

	$9\frac{1}{2}$	$8\frac{1}{2}$
	$8\frac{1}{2}$	$8\frac{1}{2}$
		$8\frac{1}{2}$

- (Time read given) + (Time info is all available)

6000,

1. 16
2. 16^6 reads
3. 2 files
4. none
